Section I: Contracting authority

I.1) Name and addresses

Defra Network eTendering Portal

17 Nobel House

London

SW1P 3JR

Contact

Felicity Jowett

Email

felicity.jowett@environment-agency.gov.uk

Telephone

+44 3459335577

Country

United Kingdom

Region code

UK - United Kingdom

Internet address(es)

Main address

<https://www.gov.uk/government/organisations/department-for-environment-food-rural-affairs>

Buyer's address

<https://defra-family.force.com/s/Welcome>

I.3) Communication

Additional information can be obtained from the above-mentioned address

I.4) Type of the contracting authority

Ministry or any other national or federal authority

I.5) Main activity

Environment

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

National Tide Gauge Network Upgrade

Reference number

P-29825

II.1.2) Main CPV code

- 71351920 - Oceanography and hydrology services

II.1.3) Type of contract

Services

II.1.4) Short description

National Tide Gauge Network Upgrade

II.1.5) Estimated total value

Value excluding VAT: £13,000,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 90711500 - Environmental monitoring other than for construction
- 71351920 - Oceanography and hydrology services
- 32441200 - Telemetry and control equipment
- 38651000 - Cameras
- 71311000 - Civil engineering consultancy services
- 71351000 - Geological, geophysical and other scientific prospecting services
- 71350000 - Engineering-related scientific and technical services
- 45220000 - Engineering works and construction works
- 45214630 - Scientific installations

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The Environment Agency collects Sea Level data for UKCFF across the UK coast. This is used operationally for flood forecasting services and for climate assessment. We are looking at new techniques and methods to do this.

The purpose of this PIN is a Request For Information, offering suppliers the preliminary opportunity to share their potential ideas for the network. We want this to be an opportunity for suppliers to show us what they have that we might not know about to identify opportunities and innovative technologies within the market that we may be underutilising or have not yet considered. We are interested in all aspects of the delivery of this solution such as marine installations, instrumentation and monitoring techniques. A briefing call is scheduled on the 17th July at 10am BST for all interested suppliers to attend and for the project team to provide a detailed presentation of the ask. A questionnaire will be issued to suppliers to be completed on their technology/approach which will incorporate the questions highlighted in this PIN (see section 3) for their technology propositions.

Further details of this project, and the briefing call invitation can be requested at uktgn@environment-agency.gov.uk

II.2.14) Additional information

The Environment Agency own the UK Tide Gauge Network and manages it on behalf of our national partners Scottish Environmental Protection Agency, Natural Resources Wales and Department for Infrastructure Northern Ireland. A group jointly known as UK Coastal Flood Forecasting (UKCFF). The UK Tide Gauge Network (UKTGN) consists of 42 tide gauges throughout the UK.

II.3) Estimated date of publication of contract notice

1 April 2024

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

Section VI. Complementary information

VI.3) Additional information

This project is aligned to deliver against three strategic ambitions of the Environment Agency (and wider partners) FCERM strategies:

1. Climate resilient places - working with partners to bolster resilience to flooding and coastal change across the nation, both now and in the face of climate change
2. Today's growth and infrastructure resilient in tomorrow's climate - making the right investment and planning decisions to secure sustainable growth and environmental improvements, as well as infrastructure resilient to flooding and coastal change
3. A nation ready to respond and adapt to flooding and coastal change - making sure local people understand their risk to flooding and coastal change, and know their responsibilities and how to act

From these three strategic ambitions the project has outlined a primary and two secondary objectives that our considered approaches will be assessed against.

The status of the TGN Improvement Project is that it has passed through approval at Strategic Outline Case (SOC) and is currently in the development phases of the Outline Business Case (OBC) therefore any dates and values given in this PIN are estimated and not indicative of final approvals or decisions
