II.2.4) Description of the procurement

The activity predominantly involves the collection, transportation and disposal of general waste arising from offices, sundry building work and business activities associated with the supply of water and treatment of wastewater. The Service Provider is responsible for the following activities on a planned basis.

The waste may derive from offices, building or demolition work, from excavations and from maintenance of Water Industry facilities.

The waste is mixed municipal waste, including paper and cardboard, glass, plastics, metals, wood and electrical and electronic equipment. The waste may contain pipes used for water supply or sewers, as well as waste from mess room facilities. The waste may also contain used protective clothing

Regional coverage - The supplier will be engaged across all Southern Water regions
