Working with stakeholders since 2023, the Authority has developed a new community pathway for people aged 16 years+, based on the East of England Musculoskeletal (MSK) Pathway Improvement Framework, the Best MSK high impact recommendations and adhering to the Getting It Right First Time (GIRFT) pathway. This new model of care intends to provide integration across patient pathways, including Single Point of Access (SPoA), clinical triage, physiotherapy, orthopaedics, spinal, rheumatology, pain management, surgical interventions and therapies across MSE. It will assess and treat more patients outside of acute services and deliver improved outcomes, quality and patient experience of care.

Estimated dates between which the service is intended to be provided: The Proposed Contract duration is five years from 2nd February 2026 until 1st February 2031, with an option to extend for a further three years beyond the initial term, until 1st February 2034.

Approximate lifetime value of the contract: At the point of publication of this PIN, the Authority proposes a cost and volume financial model (local prices) in line with national guidance. The potential aggregate contract value (incl. extension term, growth/inflation assumptions, and potential variations) is £164,452,499 (excluding VAT). The financial envelope which will act as an affordability cap for the purposes of the competitive process

will be £86,540,287 based on the initial 5-year contract term.

The Authority intends to hold a market engagement event relating to this requirement to inform the procurement approach.
