Planning

Cwm Rheidol Phase 2 Works

The Coal Authority

F01: Prior information notice

Prior information only

Notice identifier: 2021/S 000-018080

Procurement identifier (OCID): ocds-h6vhtk-02ce0e

Published 29 July 2021, 1:13pm

Section I: Contracting authority

I.1) Name and addresses

The Coal Authority

200 Lichfield Lane

MANSFIELD

NG184RG

Contact

Jacob Collishaw

Email

jacobcollishaw@coal.gov.uk

Country

United Kingdom

NUTS code

UKL - Wales

Internet address(es)

Main address

https://www.gov.uk/government/organisations/the-coal-authority

I.3) Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at

https://inbye.coal.gov.uk/s2c/

Additional information can be obtained from the above-mentioned address

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Environment

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Cwm Rheidol Phase 2 Works

II.1.2) Main CPV code

• 45254100 - Construction work for mining

II.1.3) Type of contract

Works

II.1.4) Short description

Abandoned metal mines are significant sources of metals pollution to surface waters, particularly as a result of polluted mine water discharges.

Elevated levels of metals from these discharges, primarily zinc, lead and cadmium, can have a detrimental impact on the ecology of river systems, reducing fish populations and the diversity of invertebrate fauna.

There are more than 1,300 abandoned metal mines in Wales polluting more than 600km of river reaches, making them the single biggest cause of water quality objective failures.

The Cwm Rheidol project forms part of a wider programme of works, which are intended to reduce river pollution and help restore river health downstream, directly contributing to the sustainable management of natural resources in Wales as detailed in the Environment (Wales) Act 2015 and the Well-being of Future Generations (Wales) Act 2015.

As a result of the above, National Resources Wales (NRW) commissioned The Coal Authority (CA) to assess the risks at a number of abandoned mine sites, with Adit 9 at Cwm Rheidol being the most significant and critical risk identified to date.

Blow-out risk assessment reports have concluded that there is a potentially high risk of blow-out at Adit No.9 due to an existing blockage in, and progressive collapse of, the existing adit between the adit portal and rockhead.

The principle objective of the Cwm Rheidol blow-out mitigation works is to reduce or permanently remove the risk of a minewater blow-out at Adit No.9.

The Coal Authority on behalf of Natural Resources Wales (NRW) have undertaken a study to assess the risk and magnitude of a potential blow-out and concluded that there is a risk that up to 2,112m3 of water could blow-out of the adit portal at any time.

A two phased approach is proposed to mitigate this risk;

Phase 1 - The construction of a 2,112m3 capacity dry lagoon and engineered channel to convey any blow-out water from Adit No. 9 to the lagoon. Phase 1 is being carried out under the NRW framework

Phase 2 - Draining down the adit and preventing future blow-out risk by introducing a permanent drain through the blockage in the adit and stabilising the roof. Phase 2 will be tendered under NEC4 contract conditions.

Please note that this Prior Information Notice is for works to be undertaken as part of Phase 2 only.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

• UKL - Wales

II.2.4) Description of the procurement

Requirements of Phase 2 works:

- To design and install a clear drainage path of minimum 300mm clear diameter into the adit as far as rockhead
- Include some form of redundancy (backup) such as twin pipes or equivalent
- Design life 50 years
- Infrastructure to be protected from further roof collapse
- Infrastructure resistant to the chemical and pH characteristics of the mine water
- Stabilisation of the adit roof structure such that further collapses are prevented
- Reconstruction of any adit infrastructure at at the portal to replicate the historical mine portal
- The works at adit 9 will include entry of persons into the adit and /or removal or alteration of mine infrastructure, therefore the works will fall under the Mines Regulations 2014 rather than the Construction Design and Management Regulations 2015

II.3) Estimated date of publication of contract notice

6 September 2021

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section VI. Complementary information

VI.3) Additional information

Supplier engagement notification

Prior to starting the formal tendering process, The Coal Authority will host a supplier engagement event via Zoom.

The purpose of these events are to provide further information about this requirement, the tendering process, and to invite feedback and questions from potential bidders.

Dates/times:

Wednesday 18th August 2021 - 10:00

Interested parties should email Jacob Collishaw - <u>JacobCollishaw@coal.gov.uk</u> to book a place or if there are any queries about this requirement.
