II.2.4) Description of the procurement

The Specialist Electrical Maintenance Contract shall ensure that all maintainable assets in scope, including software, non-fixed plant and equipment within the various premises are maintained to the required 'fit for function' performance level, meeting the manufacturer's and installer's recommendations (whilst taking account of any supplementary servicing needs that arise from the as-built environment) and to ensure strict compliance with all statutory/legal and mandatory obligations. Business continuity is imperative as numerous key scientific areas require 24/7 response within 4 hours to FM problems as consequent failures of scientific experiments can put months of research in jeopardy. In addition to the maintainable assets listed in ITT Appendix A Specification a significant proportion of this contract requires a specialist Building Management Systems (BMS) contractor to maintain and service the specialist state-of-the-art facilities, which use complex Tridium and Trend engineering solutions to support the challenging needs of complex scientific research programmes.
