Scottish Fire and Rescue Service (SFRS) has a statutory duty, under the Fire (Scotland) 2005 Act to make provisions in relation to fire fighting and a range of other emergencies including road traffic collisions, flooding, search and rescue, chemical, biological, radiological and nuclear incidents, as well as having the power to respond to other incidents at its discretion

SFRS currently operate four Hapsite chemical identification systems as part of the Detection, Identification and Monitoring (DIM) capability. This equipment was originally provided to legacy services by Scottish Government under the New Dimensions project, and this equipment forms part of the national resilience Chemical, Biological, Radiological and Nuclear defence (CBRN) and local hazmat capability inventory.

The Hapsite Systems are used to identify substances involved in Hazmat/CBRN Incidents and they must be kept available for CBRN/Hazmat incidents within Scotland as well as for any Mutual Aid requests from any other FRS's at a UK level.

The original maintenance contract was established by the Scottish Government as part of the New Dimensions Project and was awarded to Inficon Ltd who are the sole provider of the required Preventative Maintenance and Performance Testing Services that are required. SFRS propose to award a contract to Inficon for a period of three years with the option to extend by a further one-year period.

Procuring these services will ensure that there is no compromise in mutual-aid

agreements with the wider UK Fire and Rescue Services thereby ensuring that the cross-border response to Chemical, Biological, Radiological and Nuclear (CBRN) incidents is not compromised.

Procuring these services will allow SFRS to continue to observe National Operational Guidelines (NOG) for UK National Resilience arrangements.

#### **VI.4.3) Review procedure**

Precise information on deadline(s) for review procedures

The Scottish Fire and Rescue Service (SFRS) must, by notice in writing as soon as possible after the decision has been made, inform all tenderers and candidates of its decision to award the contract, conclude the framework agreement or establish a dynamic purchasing system. The SFRS will incorporate a minimum 10 calendar day standstill at the point information on the contract award is communicated to tenderers. The SFRS is obliged to comply with the regulations and any eligible economic operator can bring an action in the Sheriff Court or the Court of Session where as a consequence of a breach by the SFRS, they suffer or risk suffering loss or damage. The bringing of court proceedings during the standstill period means that the SFRS must not enter into the contract, conclude the framework agreement or establish the dynamic purchasing system unless the proceedings are determined, discontinued or disposed of: or the court, by interim

order, brings to an end the prohibition. The bringing of court proceedings after the standstill period has elapsed and the remedies that are available to the courts are detailed in the regulations.
