Description

GTR requires an on-ground billing data service to ensure that GTR is not at risk of any wash-up in VTAC/EC4T billing from Network Rail. AtkinsRealis provide an approved NR product which collects compliant data for correct billing. It is a fully automated service and without this GTR would be at risk of an additional wash-up cost. Energyx is fully compatible with GTR's onboard meters across all fleets and compliant to NR OTM billing interface.
