Section VI. Complementary information

VI.3) Additional information

FLS may modify the contract, irrespective of the monetary value of those modifications, within the scope permitted under Regulation 72 (1) of The Public Contracts (Scotland) Regulations 2015, should Operational reasons require it. Actual requirements can vary due to changes in:

Changes to Operational programmes due to:

identification of a protected species on site e.g. eagle nesting;

budget availability increasing or decreasing ground preparation requirements;

plant health implications resulting in an increase in felling operations which may prompt the requirement for additional ground preparation services;

Site availability;

Requirements to increase or decrease fallow periods;

Changes to Renewables Projects - planning permission for some Projects may not come to fruition – this would result in additional land bank that may require ground preparation services;

Policy Changes - The current drive from Scottish Government to reduce the organisation's land bank across the National Forest Estate may result in additional ground preparation work being required;

Developing climate change emergency initiatives to increase carbon capture opportunities such as developing innovative procedures and methods to deliver ground preparation services in a way that reduces the impact on the environment.
