Scope

Description

Border to Coast has propositions within Public Listed, Private Markets, and Real Estate asset classes that deliver investment opportunities and management to our Partner Funds, with specific systems in place for each asset class.

As part of our strategy to offer more capabilities to our Partner Funds and a unified approach to data within the organisation, we need to implement a platform that enables management of, and insight into, Partner Fund cross-asset investments.

We wish to procure an investments and data platform to support the efficient and effective implementation of these new capabilities. The platform needs to have interoperability with our administrator and other third parties to enable reporting on the whole customer fund and the provision of these new capabilities.
