II.2.4) Description of the procurement

The London Borough of Haringey are seeking to procure a suitably competent contractor

to deliver the works, which will be awarded using the ICC Measurement version Conditions of Contract.

The replacement footbridge structure has been designed to RIBA Stage 4 and takes the form of a 16m span steel warren truss supported on bored piled reinforced concrete abutments. The embankments are partially constructed in reinforced earth and new accesses to the Parkland Walkway are to be provided by reinforced concrete ramps and stairs. The site will require landscaping upon completion to blend into the nature reserve setting.

The worksite is formed by a restricted footprint immediately surrounding the structure and sits within an environmentally sensitive area, which will require limitations in access and methods of construction in order to mitigate ecological damage.

A separate compound area will be provided a distance of 60m north from the structure.

No diversions of Statutory Undertaker's plant are required, utilities in Stanhope road will only require a watching brief from statutory undertaker's engineers.

Planning approval has been granted for the scheme with conditions. The scheme contractor will be required to discharge a number of the planning Conditions prior to commencement and during the Works. All tender documents are available here; <https://s2c.waxdigital.co.uk/ProcurementLBHaringey/DisplayModules/TradeModules/Negotiations/Opportunities/ListEvents.aspx>

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents
