II.2.4) Description of the procurement

We produce enough food across the world to wipe out global hunger, however, one-third of it goes to waste. That's 1.3 billion tonnes of food thrown away.

The UK throws away around 9.52m tonnes of food per year. this emits 25m tonnes of CO2e, more than Kenya's total annual emissions. Although the UK has cut down on its food waste in recent years, we still throw away an astonishing amount of edible food.

There are currently no mandatory food waste reduction targets in the UK, however Scotland plans to introduce a target of 33% by 2025.

Suppliers are invited to tender for the provision of a cost effective and efficient, sustainable food waste collection and disposal service to the Universities, colleges and

the wider public sector.

The collection must help reduce waste generation, divert food from landfill and create a valuable fuel/alternative source from the output where possible, in line with the practical application of the waste hierarchy. The system must work in line with current and future Legislation under each Country within the United Kingdom.

II.2.4) Description of the procurement

Suppliers are invited to tender for the provision of a Certified Compostable Catering Packaging Waste Service. The service must be provided to the very highest environmental standards to help reduce GHG emissions, tackle the climate emergency and must work in line with current and future Legislation under each Country within the

United Kingdom.

Food packaging waste is predicted to increase as a result of an ever-increasing demand for convenience food, takeaway foods, and individual wrapping of fresh produce.

Composting is a form of recycling. Compostable disposables and packaging are designed to be recycled in an industrial composting facility together with food waste. However, some companies need the packaging collecting separately due to the exact formula needed to process food waste/packing through an in-vessel composter or other suitable and agreed process.
