Regional or local authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

On Street Electrical Vehicle Charging Points

Reference number

NCCT42284

II.1.2) Main CPV code

- 31158000 - Chargers

II.1.3) Type of contract

Supplies

II.1.4) Short description

Norfolk County Council is considering letting one or more contracts for electric vehicle charge points in residential areas. The council is looking for private sector funding of that part of the capital cost not covered by the Office for Zero Emission Vehicles, either by way of match-funding in return for a revenue share or by means of a concession contract.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 31158000 - Chargers
- 63712600 - Vehicle refuelling services
- 38731000 - Token meters

II.2.3) Place of performance

NUTS codes

- UKH17 - Breckland and South Norfolk

- UKH16 - North and West Norfolk
- UKH15 - Norwich and East Norfolk

II.2.4) Description of the procurement

Norfolk County Council is considering letting one or more contracts for electric vehicle charge points in residential areas. The council is looking for private sector funding of that part of the capital cost not covered by the Office for Zero Emission Vehicles, either by way of match-funding in return for a revenue share or by means of a concession contract. The council has done detailed work with UK Power Networks to identify an initial tranche of 40-50 potential sites for pairs of chargers located in residential areas of Norwich, largely in permit parking zones where there are few private driveways. The council is likely to submit a bid to OZEV under the On-street Residential Chargepoint Scheme for this tranche. A map showing the potential sites <https://arcg.is/TH8nf> Details of likely connection costs are available to view as clarification on in-tend, once you are registered. There may be opportunities for further tranches of on-street chargepoint rollout in other urban areas across the county. The council wishes to adopt a flexible procurement strategy which gives it the option to extend the initial rollout if it so chooses. The council now wishes to discuss its commercial strategy with suitably qualified potential bidders with access to the necessary financial backing, personnel and supply chains. The council is particularly interested to discuss:

- potential for a return to the authority
- incentivising high availability and good customer service
- technical refresh
- ownership of equipment and connections at end of contract
- degree to which the council should specify standards
- length of contract
- other contractual terms of particular concern to potential bidders
- authority influence on price to the consumer
- consumer payment mechanisms – contactless, app, RFID, roaming, etc
- technical boundaries – respective role of the DNO, the council and the concessionaire
- traffic regulation orders etc

The council is also mindful of the potential opportunity for concessions for destination and rapid charging facilities across the county and would be interested to discuss this issue at the same time. Potential bidders are invited to register clicking this link and completing this form <https://forms.office.com/r/uAn8kY1cUw> The council will invite significant players to online meetings in the 2nd half of August or early September.

II.3) Estimated date of publication of contract notice

1 December 2021

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

Section VI. Complementary information

VI.3) Additional information
