## Section VI. Complementary information

### VI.3) Additional information

This is a Provider Selection Regime (PSR) intention to award notice. The award of this contract is subject to the Health Care Services (Provider Selection Regime) Regulations 2023. For the avoidance of doubt, the Provision of the Public Contracts Regulations 2015 do not apply to this award. The Publication of this notice marks the start of standstill period. Representations by providers must be made to decision makers by 09/07/2024.

Written representations can be emailed to [jevgenija.zulfugarova@nhs.net](mailto:jevgenija.zulfugarova@nhs.net)

-The provider's current performance and likely future performance was assessed against five key criteria established in line with PSR guidance:

key criteria 1. Quality and innovation

key criteria 2. Value

key criteria 3. Integration, collaboration and service sustainability

key criteria 4. Improving access, reducing health inequalities and facilitating choice

key criteria 5. Social value

no conflicts of interest have been declared

The Trust has provided a rationale for choosing the provider with reference to the key criteria:

\_\_\_Key Criteria 1 - Quality Criteria

The Provider consistently maintained high-quality standards in patient care and service delivery during the assessment period. The assessment of quality criteria is summarised as follows:

The Provider's performance under the contract was regularly monitored and reviewed, adhering to Service Level Agreements (SLAs) and delivering required services promptly and to a high standard. Performance metrics consistently met or exceeded expectations, with any minor issues promptly resolved.

Prior to each contract review meeting, The Provider would send regular activity reports, detailing the number of appointments each month. These metrics proved instrumental in

evaluating performance under the contract.

Effective communication and prompt resolution of concerns by The Provider contributed to maintaining a positive working relationship.

The Provider consistently complied with all contractual obligations and SLAs throughout the contract period, including registration with the Care Quality Commission (CQC) and adhering to all relevant regulations and standards. They demonstrated adaptability in managing increased demands or unexpected challenges by adjusting resources and plans accordingly.

## Conclusion

Overall, The Provider has performed well, delivering quality high standards services, and maintaining good communication and compliance.

## \_\_\_Key Criteria 2 - Value Criteria

"Providers are encouraged to consider innovative service delivery models, which may make flexible use of the range of medical and non-medical primary care staff to meet the needs of the unit/s population"

The provider put emphasis on the importance of delivering high-quality healthcare services at a reasonable cost. The continuation of the service provided by this provider is an added value in terms of outcomes achieved and number of patients appointments fulfilled.

## \_\_\_Key Criteria 3 - Integration, collaboration and service sustainability

The Provider who deliver our services excels in integration, collaboration, and sustainability. They work with our existing healthcare systems, ensuring comprehensive patient care. Their active participation in team meetings and effective communication with ward staff highlight their collaborative and supportive approach. Additionally, their commitment to sustainable practices, like advocating for more GP time and following national guidelines, ensures high-quality care over the long term. This integrated and collaborative approach not only improves patient outcomes but also strengthens our healthcare services.

## \_\_\_key criteria 4. Improving access, reducing health inequalities and facilitating choice

By working closely with LPT, the provider can ensure that services and treatments are accessible to all eligible patients, addressing barriers to care within well established community. The Provider plays a crucial role in tackling health inequalities by providing targeted interventions and support to underserved communities. Additionally, by offering patients a range of treatment options and respecting their preferences, GP practices help ensure that patients have meaningful choices in their healthcare decisions. This collaborative

approach helps create a more equitable and patient-centered healthcare system.

This criteria directly links to the service specification which outlines the importance of our patient groups who suffer from severe mental illnesses and who can access GP support whilst being inpatient on the wards.

The provider's performance is evident through regular reports on appointments and consistent contract and operational meetings. This ensures transparency and allows for continuous monitoring and improvement of services.

\_\_\_key criteria 5. Social value

By delivering services under this contract the provider supports government strategy "No Health without mental health" :

This service provision is in place to ensure that those suffering from severe mental illness and/or a learning disability who are resident within the inpatient units can have easy access to a GP or primary care service when they are not able to maintain contact with their own GP and by doing so Provider supports the strategy that, 'More people with mental health problems will have good physical health'
