Other type

Health Research and Development

I.5) Main activity

Other activity

Health research

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Biological Sample Processing, Genotyping, and Storage

II.1.2) Main CPV code

- 73111000 - Research laboratory services

II.1.3) Type of contract

Services

II.1.4) Short description

The scope of the procurement is receipt, processing and DNA extraction of blood samples from 5 million participants; design, manufacture and assessment of a high-throughput genome-wide genotype assay; the provision of a genotype service; and ultra-low temperature, long term storage of plasma, buffy coat, and DNA. The aim for commencement of these agreements is December 2021.

II.1.5) Estimated total value

Value excluding VAT: £212,000,000

II.1.6) Information about lots

This contract is divided into lots: Yes

Tenders may be submitted for all lots

Maximum number of lots that may be awarded to one tenderer: 7

II.2) Description

II.2.1) Title

Biological sample Receipt & Processing

Lot No

1 - England

II.2.2) Additional CPV code(s)

- 71900000 - Laboratory services

II.2.3) Place of performance

NUTS codes

- UKH - East of England
- UKI - London
- UKF - East Midlands (England)
- UKG - West Midlands (England)

- UKC - North East (England)

Main site or place of performance

EAST OF ENGLAND,LONDON,EAST MIDLANDS (ENGLAND),WEST MIDLANDS (ENGLAND),SOUTH EAST (ENGLAND),SOUTH WEST (ENGLAND),YORKSHIRE AND THE HUMBER,NORTH WEST (ENGLAND),NORTH EAST (ENGLAND)

II.2.4) Description of the procurement

The aim of Our Future Health is to recruit up to five million adults from across the UK to take part in the largest research study of its kind. Participants will be asked to provide information about their health and lifestyles and small sample of their blood.

We will ask for permission to combine the information and samples that they give us with existing information about them, including their health records. Adding these additional types of information will help to build a more comprehensive picture of health and wellbeing that could be relevant to understanding what changes people's risk of disease.

Combining these multiple sources of health and health-relevant information, including genetic data, will create an incredibly detailed picture that represents the whole of the UK. Researchers will use this information to make new discoveries about human health and diseases.

We will use the health information, including genetic data, to calculate disease risk scores for participants in Our Future Health where possible. Based on these risk profiles, it might be possible to better identify individuals who are at higher risk of developing certain diseases. This will provide an opportunity to test the potential of new diagnostic tests or treatments as they are discovered and to see how effective they could be for people at higher risk of certain diseases. This will also mean Our Future Health can facilitate research addressing important questions about the potential uses of new 'genetic risk scores' in health care.

In order to achieve this aim, Our Future Health needs to contract for services to process 2 x 6 ml EDTA blood samples from each of the 5 million participants with the aim to commence from December 2021. Processing will include barcode scanning receipt, fraction separation by centrifugation, aliquoting of plasma and buffy coat, DNA extraction, quantification and normalisation, temporary storage at low and ultra-low temperatures, effective IT and LIMS for tracking all child aliquots, and shipment of specimens for long term storage or genotyping.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £54,500,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

48

This contract is subject to renewal

Yes

Description of renewals

Extensions of up to 12 months (per renewal) subject to a maximum Term of 7 years in total

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: Yes

Description of options

The contract includes options to provide additional services which are detailed in the procurement documents

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No
