## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

3206/JN - Multi-Parameter Hydrogen Fuel Cell Test Station

Reference number

3206/JN

#### **II.1.2) Main CPV code**

- 38500000 - Checking and testing apparatus

#### **II.1.3) Type of contract**

Supplies

#### **II.1.4) Short description**

With co-funding from the European Regional Development Fund, the University of Sheffield has established a flagship national Translation Energy Research Centre (TERC) - a multitechnology, integrated platform for research, development and innovation at pilot-scale, to understand and demonstrate green energy solutions for a secure, affordable and sustainable energy system. It is one of the largest and best-equipped research and development facilities in Europe for zero-carbon energy, hydrogen, bioenergy, CCUS and combustion.

We aim to procure a hydrogen fuel cell tests station. It will be used to investigate the impact of the operating conditions (i.e. the temperature, pressure, gas composition and humidity) on single fuel cell or small fuel cell stacks. It will be also used to investigate the effect of the new materials and/or designs on the fuel cell performance.

### VII.2) Other additional information

Change in supplied equipment - This change has been made in accordance with Article 72(1)(c) of the European Directive and PCR 2015. This change was brought about due to the hydrogen equipment market suffering due to a combination of worldwide factors including the pandemic and the war in Ukraine. This has severely impacted the supply chain of the original equipment making it not viable due to funding restrictions and timescales. The new equipment follows the original scope and nature of the contract while allowing achievable timescales.
