OCD number: ocds-h6vhtk-050df5

Scope

Description

The Ministry of Defence (MOD) has an enduring requirement for the provision of Test and Evaluation (T&E) services. T&E is core to all Defence equipment programmes to ensure the reliability and fitness for purpose of the equipment it uses.

The MOD has established a T&E Transformation Programme which is reviewing how T&E will be delivered in the future and how new, innovative technologies can improve and enhance current capability to enable T&E for military advantage rather than solely for equipment acceptance.

The Transformation Programme is developing a new requirement for the provision of future T&E services and there is an opportunity for Industry to help shape this. The MOD has identified the following potential grouping of T&E services to facilitate a conversation with industry, but this is not exhaustive and will likely evolve because of our engagement:

- Virtual T&E Platform: Common infrastructure, architecture, assets and capabilities required to support modelling and simulation-based T&E.
- Live T&E Platform: Centrally funded estate, range infrastructure and T&E capability to support real world testing and data capture for evaluation and model validation.
- Deployable T&E Platform: Common enablers of T&E capabilities that can be deployed and user-operated anywhere.

Contract dates (estimated)

- 1 April 2033 to 1 April 2043
- Possible extension to 1 April 2048
- 15 years, 1 day
