Scope

Description

A total-body/long-axial-FoV PET-CT system (TB PET-CT) to be used for its predominantly oncology clinical PET service, as well as research both locally and for the wider/national community.

Total value (estimated)

- £7,500,000 excluding VAT
- £9,000,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 1 April 2026 to 31 March 2031

- Possible extension to 31 March 2036
- 10 years

Description of possible extension:

Extensions will be used for additional years of maintenance cover

Options

The right to additional purchases while the contract is valid.

As an optional extra, the Contrating Authority requires a specification and costing for the installation of a rapid-access, high capacity image archive compatible with the Total Body PET-CT system, suitable for storing up to 1 petabyte of image data. The specification should include installation of the high bandwidth connection between the associated scanner workstations to enable rapid archiving and retrieval. We are still exploring options for archive provision, and would like further information about the requirements of such an archive for this TB PET-CT system and the cost of the scanner manufacturer providing this system as part of the scanner purchase.
