Reference number

DN543053

#### II.1.2) Main CPV code

• 71000000 - Architectural, construction, engineering and inspection services

#### II.1.3) Type of contract

#### Services

#### II.1.4) Short description

Newcastle University own and use multiple Local Exhaust Ventilation (LEV) systems such as fume hoods, Microbiological Safety Cabinets (MSCs) and numerous, often bespoke, systems including capture hoods and booths. The Control of Substances Hazardous to Health (COSHH) Regulations 2002 require LEV systems to undergo a thorough examination and test every 14 months by a competent person. To ensure regulatory compliance the University wishes to engage with a demonstrably competent supplier to assist with the management of our LEV systems by providing thorough examination and tests, fumigation and repair services including the provision of building-wide surveys and action planning. Testing is required in multiple buildings within the city centre campus and outlying sites including, but not limited to, the University farms at Cockle Park and Nafferton and the Dove Marine facility in Cullercoats (See Appendix 1 Campus Map and Appendix 2 Number of LEV). LEV systems are grouped by building but can also be grouped by the Unit (School/Institute/service) that owns and is responsible for the system(s). One building may house systems owned by multiple Units. End user contacts are assigned to each LEV system and this is based on the Unit to which the LEV belongs. The scope of the contract is to establish a framework agreement with one supplier appointed to deliver the entire service as described in the technical specification (Section 3). The supplier will be appointed based on the award criteria stated in Section 2.5. The chosen supplier will be required to carry out University-wide management of our LEV systems including servicing according to Regulation 9 of COSHH, repair, fumigation and building-wide surveys at the locations stated in Section 2.2 and appendix 2. Please note the numbers of LEV systems is subject to fluctuations. No warranties can be given as to the exact number of LEVs are to be serviced or fumigated each year. The management of our LEV systems includes whole scale management of the testing programme. Once provided with the details of LEV equipment, scope of works, locations and contacts the preferred contractor will manage the whole process to ensure the scope of works are completed.

#### II.1.6) Information about lots

This contract is divided into lots: No

## II.1.7) Total value of the procurement (excluding VAT)

Lowest offer: £250,000 / Highest offer: £400,000 taken into consideration

# **Section VI. Complementary information**

## VI.4) Procedures for review

VI.4.1) Review body

**Newcastle University** 

Newcastle upon Tyne

Country

**United Kingdom** 

#### VI.4.3) Review procedure

Precise information on deadline(s) for review procedures

Newcastle University will incorporate a minimum 10 calendar day standstill period at the point information on the award of the contract is communicated to tenderers. This period allows unsuccessful tenderers to seek further debriefing before the contract is entered into. Applicants have 2 working days from notification of the award decision to request additional debriefing and 4 / 4 that information has to be provided a minimum of 3 working days before expiry of the standstill period. Such additional information should be requested from the address referred to in part 1.1 above. If an appeal regarding the award of a contract has not been successfully resolved, the Public Contracts Regulations 2015 provide for aggrieved parties who have been harmed or are at risk of harm by a breach of the rules to take action in the High Court (England, Wales and Northern Ireland). Any such action must be brought promptly. Where a contract has not been entered into the Court may order the setting aside of the award decision or order the authority to amend any document and may award damages. If the contract has been entered into the Court may only award damages
