Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

A Request for information was conducted via the e-tendering portal along with contracts finder, to gauge if there was interest and capability to deliver to the requirements from the market. The outcome of this exercise demonstrated that only 1 bidder was able to deliver an off the shelf solution and due to the timelines, bespoke options were not a viable option.

We therefore intend to proceed with the award relying upon Regulation 32.

Use of the negotiated procedure without prior publication

32.—(1) In the specific cases and circumstances laid down in this regulation, contracting authorities may award public contracts by a negotiated procedure without prior publication.

(2) The negotiated procedure without prior publication may be used for public works contracts, public supply contracts and public service contracts in any of the following cases:—

(b)where the works, supplies or services can be supplied only by a particular economic operator for any of the following reasons:—

(ii)competition is absent for technical reasons

but only, in the case of paragraphs (ii) and (iii), where no reasonable alternative or substitute exists and the absence of competition is not the result of an artificial narrowing down of the parameters of the procurement

The number of e-portal entries carried out to find suitable supplier interest is sufficient to pass the test that absence of competition is not due to an artificial narrowing of the procurement and the sole technical ability of 1 provider to deliver what is required for the services needed enables Reg 32 (2) (ii) to be used.
