The SSOT ICB has set an indicative contract annual value of £2.93m per annum, with a £14.66m value for the lifecycle of the contract (including extensions), providers are encouraged to submit their costings within this budgetary threshold, as higher cost submissions may not be considered.

It is envisaged that TUPE provisions will apply to the new contract.

This is an existing service but one that has been modified.

- details of the award decision-makers: ICB Board
- note any declared conflicts or potential conflicts of interest of individuals making the decision and how these were managed: no conflicts identified
- include a statement explaining the relative importance of the key criteria that the relevant authority used to make a decision, the rationale for the relative importance of the key criteria, and the rationale for choosing the provider with reference to the key criteria:

There were twenty-nine questions divided across the five areas of key criteria which included: Key criteria 1. Quality and Innovation, Key criteria 2. Value, Key criteria 3. Integration, collaboration and service sustainability, Key criteria 4. Improving Access, reducing health inequalities and facilitating choice and Key criteria 5. Social Value.

Following the receipt of the responses the ICB project panel assessed the responses to determine whether a provider met the requirements. The assessment was completed on a pass/fail basis of the basic selection criteria; and in terms of the key criteria, SSOT ICB reviewed how providers either met or did not meet the ICB's requirements for each question in the Key Criteria questionnaire.

The requirements for each question in the Key Criteria questionnaire were set out in the information supplied with the PIN notice (2024/S 000-014425) and each question contained a descriptor of what SSOT ICB's requirements were for that question.

The rationale for choosing the Most Suitable Provider was based on the panel assurance regarding their responses in all areas of the key criteria, although the panel felt that the responses in relation to both the quality and innovation, and integration, collaboration and service sustainability was strong and these two areas were key components of the both

service delivery and future innovation
