General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

How do we better plan, manage and respond to the experiences of both people coming to 'visitor hotspots' in rural and remote locations, and the communities in the area?

II.1.2) Main CPV code

- 72000000 - IT services: consulting, software development, Internet and support

II.1.3) Type of contract

Services

II.1.4) Short description

Covid-19 restrictions mean that infrastructure designed for visitors and communities near to "visitor hotspots" in rural and remote areas can be overwhelmed, as was experienced throughout 2020.

In Scotland, local authorities and other public services anticipate sustained demand on infrastructure, teams, volunteers and resources. The experiences of visitors and residents are all impacted by public services that provide infrastructure for transport and parking, camping, littering and waste management, leisure, health and safety.

There is an opportunity to develop technology that can help create positive experiences for visitors and local communities while also contributing to sustainable tourism and the wellbeing including economic benefits of rural and remote communities.

Please visit our website for information on CivTech and how to get involved.

- 55200000 - Camping sites and other non-hotel accommodation

II.2.3) Place of performance

NUTS codes

- UKM - Scotland

II.2.4) Description of the procurement

About CivTech

CivTech's mission is to drive daring and innovation in the public sector by collaboratively solving challenges that make people's lives better – and in doing so create generations of sustainable, high growth businesses.

CivTech brings together public sector expertise and private sector innovation to solve real problems, develop new products, and deliver better, faster and easier services for everyone. Central to the approach is co-production with the citizen.

Part of the Scottish Government's Digital Directorate, CivTech's approach is helping transform public sector engagement with tech and innovation, delivering significant benefits to public services, producing genuine uplifts for the Scottish economy - and along the way, making lives better.

Across the country there are problems public sector organisations would like to solve and in the current environment the need for smart, efficient and effective products has never been greater. The Scottish Government is aware innovation is a good way to create them and is committed to ensuring a large part of its tech spend goes to smaller, innovative businesses. This is where CivTech comes in.

The CivTech Innovation Flow is designed to create products as quickly and effectively as possible, and uses a true Accelerator model at the heart of its Innovation Flow model. For you – whether you're an individual, team or company – it's an opportunity to take on a Challenge, solve it, and win contracts with a blue-chip public sector organisation. You'll build a product, and a business to take it as far as possible. Because here's the kicker:

the Challenges we issue aren't 'single organisation' problems – most exist worldwide.

In short: Open Challenges are set. Any organisation, team or individual can respond. Applications are assessed, and shortlisted proposals go into an Exploration Stage where they're developed further [for which participating applicants are paid]. The best go through to the Accelerator – a period of intensive work to create the solution, and through CivTech's unique business workshop system, a business capable of taking the product to the world.
