## **Section II: Object**

#### II.1) Scope of the procurement

#### II.1.1) Title

Low Carbon Inertia Service Procurement - Phase 1

Reference number

**SONI029** 

#### II.1.2) Main CPV code

• 71314000 - Energy and related services

#### II.1.3) Type of contract

Services

#### II.1.4) Short description

The objective of this PQQ process is to produce a short-list of suitably qualified Candidates who will be invited to tender for the provision of a Low Carbon Inertia Service (LCIS).

This document provides an overview of the expected requirements for the Low Carbon Inertia Service to be procured. The exhaustive list of requirements will be confirmed at tender stage once all regulatory decisions are made.

Volumes to procure:

The Total targeted inertia volume is 4000MVA.s.

The Contracts sizes may vary between 900MVA.s and 2000MVA.s. It is expected that there will be at least 2, but possibly up to a maximum of 4 contracts awarded in Northern Ireland.

Note that locational incentives and /or minimum locational requirements may apply and these will be confirmed at RFP stage.

Note that a price cap will be introduced and confirmed at tender stage. The volumes targeted might not be procured if bids exceed the price cap and subsequently the number of contracts awarded might be reduced.

Note also that the mechanism by which the bids will be stacked and cleared will be confirmed at tender stage.
