Tender

NHS South Yorkshire - Mobile Cervical Screening Pilot

NHS South Yorkshire Integrated Care Board

F02: Contract notice

Notice identifier: 2024/S 000-021122

Procurement identifier (OCID): ocds-h6vhtk-047c5b

Published 10 July 2024, 3:32pm

Section I: Contracting authority

I.1) Name and addresses

NHS South Yorkshire Integrated Care Board

197 Eyre Street

Sheffield

S1 3FG

Contact

Neill Scott

Email

syicb.procurement@nhs.net

Country

United Kingdom

Region code

UKE32 - Sheffield

Internet address(es)

Main address

<https://www.southyorkshire.icb.nhs.uk/>

Buyer's address

<https://www.southyorkshire.icb.nhs.uk/>

I.3) Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at

<https://health-family.force.com/s/Welcome>

Additional information can be obtained from the above-mentioned address

Tenders or requests to participate must be submitted electronically via

<https://health-family.force.com/s/Welcome>

Tenders or requests to participate must be submitted to the above-mentioned address

Electronic communication requires the use of tools and devices that are not generally available. Unrestricted and full direct access to these tools and devices is possible, free of charge, at

<https://health-family.force.com/s/Welcome>

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

NHS South Yorkshire - Mobile Cervical Screening Pilot

Reference number

SYICB/ICS/NS/24/67

II.1.2) Main CPV code

- 85121210 - Gyneacologic or obstetric services

II.1.3) Type of contract

Services

II.1.4) Short description

The aim of this project is to set up and trial a mobile cervical screening unit to explore the impact on uptake rates of the cervical cancer screening programme in Doncaster, and the user's experience of using the mobile unit.

II.1.5) Estimated total value

Value excluding VAT: £10,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKE3 - South Yorkshire

Main site or place of performance

Doncaster

II.2.4) Description of the procurement

The procurement falls outside the scope of application of the Public Contract Regulations 2015.

Explanation: This is a Provider Selection Regime (PSR) intention to award notice. The awarding of this contract is subject to the Health Care Services (Provider Selection Regime) Regulations 2023. For the avoidance of doubt, the provisions of the Public Contracts Regulations 2015 do not apply to this Competitive Process.

Key criteria

Relevant authorities must consider five key criteria when applying direct award process C, the most suitable provider process or the competitive process. These are:

- quality and innovation

Piloting a mobile cervical screening service model is key in identifying whether this method of access supports the increase of cervical screening uptake for women and people with a cervix in Doncaster. The implementation of a mobile cervical screening service may be one method of support for eligible women to overcome barriers (such as lack of time, having other commitments, difficulty accessing the primary care appointment system, travel to general practice), and support with the reduction in inequalities.

To meet the local requirements of a mobile cervical screening service, the provider will enable eligible women and people with a cervix with the option of attending cervical screening in an alternative location, either pre-bookable or on a drop-in basis where no appointment is needed.

- Value

Evidence suggests that mobile screening units are beneficial in supporting people to complete screening (5). Mobile screening units have been utilised within the breast cancer screening programme in the UK, which is also due to receive a £10 million investment to deliver 29 new units to increase screening capacity (6). Yet, no such mobile provision is in place for cervical screening, but this may be one method to increase screening uptake, and reduce the barriers identified consistently within literature/research.

Recent statistics highlights that approximately 4.6 million women aged 25 to 64 in England have never been screened for cervical cancer or are not up to date with their tests (1). Statistics further highlight that from 2020 until now, England uptake percentage has not exceeded 70% for those under 50 years old, where the acceptable uptake target is 80%, compared to those who are 50 years and above, where the uptake often reached 75% uptake (2). Those who live in deprived areas of England are approximately 40% less likely to attend their cervical screening (3).

There are multiple reasons why women and people with a cervix decide not to attend, or

delay, their cervical cancer screening appointment or delay their attendance. Factors such as lack of time, having other commitments, and making an appointment is inconvenient (4). One method to overcome these barriers and to reduce inequalities may be achieved through the implementation of a mobile cervical screening unit, including drop-in facility.

Locally from 2021/22 to 2022/23 (Fingertips Public Health Data) we have seen a 1.7% decline in cervical screening coverage between in patients aged 25 to 49 years old. Investment in these services would support mitigation of risks around later stage diagnosis, failing to meet NHS England Cancer Screening targets, as well as other targets that have been locally agreed within contracts.

- integration, collaboration and service sustainability

Piloting a mobile cervical screening service model is key in identifying whether this method of access supports the increase of cervical screening uptake for women and people with a cervix in Doncaster. This forms part of a wider programme of work within the South Yorkshire and Bassetlaw (SYB) Cancer Alliance that aims to improve screening uptake and the early diagnosis of cancer by meeting the needs of people across SYB and continuing to work in collaboration with key stakeholders including the ICB colleagues, PCNs, VCS organisations and Public Health Programme teams.

SYB Cancer Alliance developed and contributed to several projects and action plans throughout 2023/24 to improve local uptake and address inequalities in participation in

NHS screening programmes. Partnership working across SYB Cancer Alliance and SY ICB including Place and Public Health England has enabled sharing of insights on health inequalities from projects and/or business intelligence which in turn has supported the development of initiatives and campaigns to reduce inequalities in uptake, in line with Core20PLUS5. Close partnership working will continue in 2024/25 to encourage uptake and reduce inequalities (particularly deprivation-related) within screening programmes and to continue to understand and analyse the impact of targeted work with communities who have the most missed cancer screening programme screening appointments and agree a continued programme of work with these identified communities to increase a focus on screening with other stakeholders.

- improving access, reducing health inequalities and facilitating choice

The cervical mobile screening service contributes towards meeting the national NHSE cervical screening targets ('Proportion of women in the resident population eligible for cervical screening aged 25 to 49 years who were screened adequately within the previous 3.5 years' and the 'Proportion of women in the resident population eligible for cervical screening aged 50 to 64 years who were screened adequately within the previous 5.5 years') and this model is key in identifying whether this method of access supports the increase of cervical screening uptake for women and people with a cervix in Doncaster.

The implementation of a mobile cervical screening service is one method to both facilitate choice and support eligible women to overcome barriers (where lack of time to attending a specific appointment time, having other commitments or trying to facilitate general practice appointments systems is challenging), and also support the reduction in inequalities. Venues chosen include good access links via public transport.

Via a thorough, far-reaching communications strategy, offering a choice of venues and drop-in times, the cervical mobile screening service will offer additional choice to eligible women and people in a different way to current NHS primary care cervical screening services.

- social value.

The cervical mobile screening service contributes towards meeting the national NHSE cervical screening targets ('Proportion of women in the resident population eligible for cervical screening aged 25 to 49 years who were screened adequately within the previous 3.5 years' and the 'Proportion of women in the resident population eligible for cervical screening aged 50 to 64 years who were screened adequately within the previous 5.5 years') and this model is key in identifying whether this method of access supports the increase of cervical screening uptake for women and people with a cervix in Doncaster.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £10,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

3

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section III. Legal, economic, financial and technical information

III.1) Conditions for participation

III.1.1) Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers

List and brief description of conditions

This procurement falls outside the scope of application of the Public Contract Regulations 2015.

Explanation: This is a Provider Selection Regime (PSR) intention to award notice. The awarding of this contract is subject to the Health Care Services (Provider Selection Regime) Regulations 2023. For the avoidance of doubt, the provisions of the Public Contracts Regulations 2015 do not apply to this Competitive Process.

Initial term – 3 months (with the option to extend for a further 3 months)

Approx. value for the lifetime of the contract (if all extensions are enacted) - £20,000

Award Criteria:

Experience

Expertise

Proposal

Price

Offers to be submitted via the Atamis e-procurement portal

Offers will be assessed individually, in a single stage process, by a multi-disciplinary team of subject matter experts. There will then be a moderation session to discuss the separate evaluator scores and agree a single, moderated, score for each question for each bidder.

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

22 July 2024

Local time

12:00pm

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.6) Minimum time frame during which the tenderer must maintain the tender

Duration in months: 3 (from the date stated for receipt of tender)

IV.2.7) Conditions for opening of tenders

Date

22 July 2024

Local time

12:00pm

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.3) Additional information

Please note: This procurement falls outside the scope of application of the Public Contract Regulations 2015.

Explanation: This is a Provider Selection Regime (PSR) intention to award notice. The awarding of this contract is subject to the Health Care Services (Provider Selection Regime) Regulations 2023. For the avoidance of doubt, the provisions of the Public Contracts Regulations 2015 do not apply to this Competitive Process.

Therefore, the process that is being used is the Competitive Process NOT the Open Procedure indicated in IV.1.1.1

VI.4) Procedures for review

VI.4.1) Review body

NHS England

7&8 Wellington Place

Leeds
