II.1.4) Short description

The Dynamic Software and Enterprise team (DSET) within Defence Digital, part of the UK Ministry of Defence, intends to place a two-year contract with Northrop Grumman UK Ltd (“NG”) for NG Software Licence Support and respective Engineering Support Services. The software licensing and engineering support under the proposed Contract allows the provision of a critical NG application to host the C4ISR Toolset which is the mandated PJHQ J3 repository for world-wide significant operational events. This is a critical system for provision of the information environment for UK operations worldwide.

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated procedure without publication of a contract notice

- No tenders or no suitable tenders/requests to participate in response to negotiated procedure with prior publication of a contract notice
- The products involved are manufactured purely for the purpose of research, experiment, study or development

Explanation:

For technical reasons the contract may only be awarded to NG since only they own all associated technical background and IPR related to the licenses and support required. In addition, because of this, only NG can provide the 3rd & 4th line support required. This opportunity is further restricted by ITAR regulations, under which only NG are able to support this application. No other provider could deliver the requirement in the time and cost envelope required and without introducing unacceptable interoperability risk. As the service is currently operationally in-use across a vast range of assets any immediate change in provider would leave an unacceptable capability gap.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No
