II.1.4) Short description

This procurement is for the award of a Cross-Regional Supplier Framework and Initial Call-Off Contracts for multiple regions within the United Kingdom (UK). This is part of the Gigabit Infrastructure Subsidy programme.

The Gigabit Infrastructure Subsidy Programme is a government programme aimed to support the build of gigabit-capable broadband infrastructure in the areas of the UK which are unlikely to attract commercial investment for gigabit-capable broadband infrastructure within a reasonable timeframe, if at all, referred to as the final 20% (f20). Building Digital UK (BDUK, part of DSIT) will be targeting its market intervention in these areas of the UK via this subsidy award programme, to subsidise the build of gigabit-capable networks providing long-term, sustainable availability of wholesale gigabit broadband services in the hardest to reach parts of the UK. The Gigabit Infrastructure Subsidy programme builds on the success of existing programmes being delivered by BDUK to deliver gigabit-capable networks across the UK. It is envisaged this programme will last for up to 9 years and award contracts throughout that period.

II.2.4) Description of the procurement

BDUK intends to establish a Cross-Regional Single Supplier Framework, known colloquially as Type C, to award call-off contracts over the life of the Framework.

The Cross-Regional Framework is intended to appoint a single supplier to build gigabit-capable broadband infrastructure and whose role would be to target premises in respect of which (1) no or no appropriate market interest has been received through GIS market engagement steps for proposed Type A or Type B procurement areas; (2) BDUK has not awarded a contract following a procurement for Type A or Type B areas; (3) Type A or Type B contracts that cover these premises fail to be delivered by the supplier and are descoped or terminated; (4) Type C provides demonstrably better value for money or pace of build or coverage.

The Framework scope is expected to comprise up to c.500,000 premises, with a total estimated value of up to £800m. The average Call-Off Contract scope is anticipated to be between 50,000 and 150,000 premises. BDUK reserves the right to amend these figures to ensure that the framework can be used in accordance with criteria 1-4 above. Call-Off contracts awarded under the Cross-Regional Framework will subsidise the design, build and operation of gigabit-capable supplier networks providing long-term, sustainable availability of wholesale gigabit broadband services in the hardest to reach parts of the UK.

BDUK issued a PIN on 18 August 2022 - ref 2022/S 000-023019 and on 5 January 2023 - ref 2023/S 000-000266 to discuss the Cross-Regional Framework.

Suppliers should consider the pre-qualification financial thresholds are reflective of the potential anticipated annual spend against the framework. They will also need to be able to demonstrate they can deliver gigabit-capable connectivity at pace and volume to support BDUK's 2025 and 2030 objectives.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents
