Services

#### II.1.4) Short description

UU's ambition is to drive digital transformation, Systems Thinking and improved service for our stakeholders, customer and community by development of our advanced analytics and information management capabilities, using data tools and skills to deliver ethical insight and competitive advantage. With increasing complexity and variety of data available and rapid technological development of sensor and data technology, we need to facilitate the processing and analysis of more data in more complex forms. By design, our data and analytics platform must deliver data and analytics democratisation as self-service is a key strategic objective. We also need to create the ability to operate at both laboratory and factory scale to facilitate exploration and innovation to support our longer-term strategic aims. See our Scopebook (attached for more information)
