There is a requirement to provide two high-quality, ruggedised and site deployable Pulsed Current Injection (PCI) and Shield Effectiveness (SE) test capabilities in accordance with DSTAN 59-188 and MIL-STD-188-125, which shall be fully automated (excluding pulzers) and controlled by a high-quality comprehensive suite of software that provides a high level of data confidence and accuracy. The software shall integrate the end user's current PCI, SE and Continuous Wave Immersion (CWI) capabilities.

In addition to the above, there is a requirement for training to be provided to support the end user of the provided test capabilities to an expert 'train the trainer' level.
