Scope

Reference

PA 2024 1140

Description

This procurement covers supply and installation of all liquid storage applications including gravity storage/process tanks, silos, pressure vessels, including chemical storage and underground storage. Where relevant, Reg 31, PER (Pressure Equipment Regulations) / PSSR (Pressure Systems Safety Regulations) and DSEAR (Dangerous Substances and Explosive Atmosphere Regulations) regulations shall be followed. Tanks shall be manufactured to relevant UK industry standards and comply with Anglian Water asset standards and AW amended WIMES and CESWI.

Covers and roofs shall be supplied where requested and, where required, all covers and roofs shall be fully self-supported by the tank.

Permanent Access Fabrications (PAFs), including stairways and platforms - access stairways and platforms shall be fully self-supported by the tank

Testing - tanks shall be fully water-tested and where a working pressure is specified (above ambient) the tank shall be pressure tested in accordance with UK industry standards and AW asset standards.

In the event of a defect or failure during the warranty period of 1 years, the supplier will be expected to repair or replace the product within one working week from the date on which they are notified regarding product failure. The supplier will be expected to provide temporary assets for the period required to maintain operations that were undertaken by the product whilst repair or replacement is being undertaken.

Installation - tanks shall be delivered to site, off-loaded and installed by the supplier and meet all relevant Anglian Water requirements for safe working.

Install of sectional tanks to be done by supplier, install of Pre-Cast Concrete tanks to be done by @one with supplier supervision

Supplier to detail the craneage requirements for off-loading and erection; craneage may be provided by supplier, AW or its Alliances

Compatibility - tanks must be fully compatible for the application and contents that they are intended to be used for.

Design life and maintenance / inspection - Suppliers shall specify the design life of the tanks

and ancillaries under the anticipated conditions and shall identify any maintenance requirements necessary to meet the specified design life. The design life is to achieve at least the minimum life stated in any applicable standards, where there is a conflict, the maximum life is to be achieved.

Ancillaries and openings - tanks shall be supplied with manholes, connections and ancillaries as detailed in the tank data sheet. All process equipment (including launders, baffle boards) flanges, sockets and bolts shall be compatible with the fluids, interfacing materials and application of the tank.

Bunds - where integral bunds are required, these shall meet the same design standards and design life as the tank.

Design - the tank shall be designed to withstand dead loads, internal pressure, ground pressure load, wind and snow loadings, thermal effects, imposed roof load, loads due to equipment and fixtures.

Coatings - any coatings used shall be compatible with the fluids and application for which the tank is designed and meet the design life specified

Commercial tool

Establishes a framework

Total value (estimated)

- £53,000,000 excluding VAT
- £63,600,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 29 September 2025 to 28 August 2030

- 4 years, 11 months

Options

The right to additional purchases while the contract is valid.

Options include connections, tank roofs - these may not be required for all tanks, will be purchased if required.

Main procurement category

Goods

CPV classifications

- 44611400 - Storage tanks

Contract locations

- UKE1 - East Yorkshire and Northern Lincolnshire
 - UKH - East of England
-

Lot 1. Glass Fused to Steel Tanks

Description

Lot 1; See Description above for details.

Quantities and value not yet known.

Lot value (estimated)

- £8,830,000 excluding VAT
- £10,600,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations, contract dates and options are shown in the Scope section, because they are the same for all lots.

Lot 2. Glass Reinforced Plastic Tanks

Description

Lot 2; See Description above for details.

Quantities and value not yet known.

Lot value (estimated)

- £8,830,000 excluding VAT
- £10,600,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations, contract dates and options are shown in the Scope section, because they are the same for all lots.

Lot 3. Plastics Including PVC Tanks

Description

Lot3; See Description above for details.

Quantities and value not yet known.

Lot value (estimated)

- £8,830,000 excluding VAT
- £10,600,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations, contract dates and options are shown in the Scope section, because they are the same for all lots.

Lot 4. Polyethylene Tanks

Description

Lot 4; See Description above for details.

Quantities and value not yet known.

Lot value (estimated)

- £8,830,000 excluding VAT
- £10,600,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations, contract dates and options are shown in the Scope section, because they are the same for all lots.

Lot 5. Pre-Cast Concrete Tanks

Description

Lot 5; See Description above for details.

Quantities and value not yet known.

Lot value (estimated)

- £8,830,000 excluding VAT
- £10,600,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations, contract dates and options are shown in the Scope section, because they are the same for all lots.

Lot 6. Fabricated Mild Steel or Stainless Steel Tanks

Description

Lot 6; See Description above for details.

Quantities and value not yet known.

Lot value (estimated)

- £8,830,000 excluding VAT
- £10,600,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations, contract dates and options are shown in the Scope section, because they are the same for all lots.

Framework

Maximum number of suppliers

Unlimited

Maximum percentage fee charged to suppliers

0%

Framework operation description

All details are contained within the tender documentation.

Bidders are required to complete a supplied Excel template with their proposed prices based on price per Tank in each Lot. Prices will be scored with the lowest price (unless abnormally low) being given the highest score.

Contracts will be awarded on a Most Advantageous Tender basis.

Award method when using the framework

Either with or without competition

Contracting authorities that may use the framework

Establishing party only

Participation

Particular suitability

Lot 1. Glass Fused to Steel Tanks

Lot 2. Glass Reinforced Plastic Tanks

Lot 3. Plastics Including PVC Tanks

Lot 4. Polyethylene Tanks

Lot 5. Pre-Cast Concrete Tanks

Lot 6. Fabricated Mild Steel or Stainless Steel Tanks

Small and medium-sized enterprises (SME)

Submission

Submission type

Requests to participate

Deadline for requests to participate

13 June 2025, 11:00pm

Submission address and any special instructions

Access to the Request for Information on-line event is available at the following website address:

<https://esourcing.scanmarket.com/Events/PublicEvents/3004/57aa08f02740e2c172f509ae0fa4807a/all>

All interested parties must complete the Request for Information questionnaire before the deadline for requests to participate.

Tenders may be submitted electronically

Yes

Languages that may be used for submission

English

Award decision date (estimated)

15 August 2025

Award criteria

Name	Description	Type	Weighting
Qualitative Questionnaire	Full breakdown of questionnaire provided in the tender documentation	Quality	65%
Price	Full breakdown of questionnaire provided in the tender documentation	Cost	35%

Other information

Description of risks to contract performance

The geopolitical landscape, along with regulations from the Environment Agency and other governing bodies, may evolve, which may impact spend and / or the specification.

Conflicts assessment prepared/revised

Yes

Procedure

Procedure type

Competitive flexible procedure

Special regime

Utilities

Competitive flexible procedure description

The following stages will form the basis of this competitive flexible procedure:

1. Request for Information (RFI)
2. Short-listing of suppliers
3. Request for Proposal (RFP)
4. Supplier clarification meetings (if required)
5. Negotiation of contract terms and pricing may take place from the point at which RFP submissions are received to Contract Award
6. Contract Award
7. Standstill
8. Contract signature
9. Contract start

All details can be found in the tender documentation
