## VII.2) Information about modifications

### VII.2.1) Description of the modifications

Nature and extent of the modifications (with indication of possible earlier changes to the contract):

Due to unforeseen increase in inflation globally it has become apparent that proposed

projects are more expensive than originally estimated and no longer align with Framework value bands. We therefore intend to vary the value bands increasing these using BCIS indices under the existing National Construction Framework through a Regulation 72(1)(c) Public Contracts Regulations 2015 permitted modification. The overall Framework value will not be altered, and no other changes will be made.

#### VII.2.2) Reasons for modification

Need for modification brought about by circumstances which a diligent contracting authority/entity could not foresee.

Description of the circumstances which rendered the modification necessary and explanation of the unforeseen nature of these circumstances:

No extra works are needed. A change of contractor will not ensure the Framework is delivered as awarded. Projects intended to fit within certain value bands no longer fit within these due to increased inflation. Modifying will allow projects to be allocated to value bands as originally intended at award. This is a permitted modification; the inflation increase was unforeseen; the Framework's overall nature will not alter and the increase will not be 50% or more of the original Framework value.

#### VII.2.3) Increase in price

Updated total contract value before the modifications (taking into account possible earlier contract modifications, price adaptions and average inflation)

Value excluding VAT: £2,000,000,000

Total contract value after the modifications

Value excluding VAT: £2,000,000,000
