Buyer's address

<https://in-tendhost.co.uk/ntu>

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Education

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

2057 Laptops and Desktops Framework

Reference number

NTU/21/2057/ALS

II.1.2) Main CPV code

- 30200000 - Computer equipment and supplies

II.1.3) Type of contract

Supplies

II.1.4) Short description

Nottingham Trent University (NTU) is looking for a partnership or service offering to deliver a range of computer devices and accessories to support learning, teaching, research, and management of university functions.* Equipment requirements NTU will require a range of computer equipment to support our students and staff. We have developed several personas to better understand our user groups' requirements and prepare for the classroom and workplace of the future. To support each persona, we have defined a standard equipment set to support effective working. Most of our staff use laptops for enhanced mobility and flexibility, with docks to support desk-based work. We anticipate a standard laptop with low weight and long battery life but with the capabilities to run all standard office software flawlessly. In addition, we have more specific requirements for touchscreen laptops and detachable hybrid laptop/tablets to support mobile working.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £15,000,000

II.2) Description

II.2.2) Additional CPV code(s)

- 30200000 - Computer equipment and supplies

II.2.3) Place of performance

NUTS codes

- UKF - East Midlands (England)

II.2.4) Description of the procurement

Nottingham Trent University (NTU) is looking for a partnership or service offering to deliver a range of computer devices and accessories to support learning, teaching, research, and management of university functions. It is envisioned that a solution will incorporate the following features: Equipment requirements NTU will require a range of computer equipment to support our students and staff. We have developed several personas to better understand our user groups' requirements and prepare for the classroom and workplace of the future. To support each persona, we have defined a standard equipment set to support effective working. Most of our staff use laptops for enhanced mobility and flexibility, with docks to support desk-based work. We anticipate a standard laptop with low weight and long battery life but with the capabilities to run all standard office software flawlessly. In addition, we have more specific requirements for touchscreen laptops and detachable hybrid laptop/tablets to support mobile working. We also offer a large number of desktop devices in communal areas primarily for students, preferably as an All-in-one device. For desk-based workers, we use ultra-small and small form-factor computers to provide additional computing power. In order to support lecture capture, we use small form factor and ultra-small form PC's, equipped with sufficient RAM and processors with capable of processing multi-source video with minimal lag. Interface ports are important to support a range of USB 3.0 (minimum) peripherals and should be on the rear of the product. To provide digital signage, with remote management, and the capabilities to display video at a range of screen sizes, we require ultra-small form factor PCs, with video outputs suitable to support a minimum 4K UHD. Where the situation arises, we may need more specialist devices to support specific projects. The vendor should be able to provide 'bespoke' or custom builds to meet the requirements (See Tab 7 of Schedule 4 Commercial offer for example of.) In addition to laptop and desktop devices, we will also require a range of accessories and peripherals, such as monitors, keyboards, mice, and docks to support all portable devices. A range of peripherals should be available, including wired and wireless, where appropriate. In order to support cross-compatibility, docks should provide power through USB-C and support dual-screen displays. Where new technologies become available, we should be able to procure these within this agreement. In addition, we would expect the vendor to provide consultancy to assist us in deciding to onboard new technologies. Stock availability and ordering processes In order to provide a consistent and reliable service to our staff and students, the University requires the vendor to hold our standard builds in stock for next

day delivery. NTU holds no obligation to commit to purchase any stock held, nor should it be liable for 'bonded stock'. Device types should include consistent component choice over agreed time periods. Specialist configurations should be made available, including options from a wide range of manufacturers to meet specific needs. NTU should be able to purchase devices on a 'supply only' basis, including support and warranty, and as a 'managed service'. The option of a staff or student online storefront may be available. In order to support large scale rollout or change of devices at NTU, the vendor should have sufficient warehouse space to manage inventory. This may include the provision of evaluation equipment to support the transition to a new model. The University may place large amounts of equipment orders, which should be stored at the vendor as 'bonded stock'. The University should be able to request part delivery of these orders, with next day delivery.

II.2.5) Award criteria

Quality criterion - Name: Technical & Sustainability / Weighting: 60

Price - Weighting: 40

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.3) Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information

IV.2.1) Previous publication concerning this procedure

Notice number: [2021/S 000-027465](#)

Section V. Award of contract

Contract No

2057

Title

Laptops and Desktops Framework

A contract/lot is awarded: Yes

V.2) Award of contract

V.2.1) Date of conclusion of the contract

7 February 2022

V.2.2) Information about tenders

Number of tenders received: 8

Number of tenders received from SMEs: 0

Number of tenders received from tenderers from other EU Member States: 0

Number of tenders received from tenderers from non-EU Member States: 0

Number of tenders received by electronic means: 8

The contract has been awarded to a group of economic operators: No

V.2.3) Name and address of the contractor

Getech Ltd

Ipswich

Country

United Kingdom

NUTS code

- UKF - East Midlands (England)

The contractor is an SME

No

V.2.4) Information on value of contract/lot (excluding VAT)

Initial estimated total value of the contract/lot: £15,000,000

Total value of the contract/lot: £15,000,000

Section VI. Complementary information

VI.4) Procedures for review

VI.4.1) Review body

Royal Court of Justice

London

Country

United Kingdom
