## Section IV. Procedure

## **IV.1) Description**

### IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

• The procurement falls outside the scope of application of the regulations

#### Explanation:

For technical reasons, i.e. software or systems already integrated in the business and changing supplier would incur significant costs and risk - changing the ITSM tool will not only be more expensive (similar tools are typically more than 3 times the price), it will also have the following knock on affects:

- Loss of the historic records of existing assets who did what and to which asset. This is essential for regulatory purposes especially in terms of the OT assets, and is also essential to maintain the visibility of devices and software licenses for audit purposes.
- Loss of the historic changes to our SAP roles and authorisations which we require for our Governance, Risk Management and Compliance audits.
- Loss of the historic Incident and Change information that we use to enable fault finding across our systems.

#### IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No
