Main address

<https://www.northernpowergrid.com/>

I.2) Information about joint procurement

The contract is awarded by a central purchasing body

I.6) Main activity

Electricity

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Electric Plant Storage

Reference number

NPg20005

II.1.2) Main CPV code

- 63120000 - Storage and warehousing services

II.1.3) Type of contract

Services

II.1.4) Short description

Electrical plant to be used on substation replacement projects needs to be temporarily stored following delivery from the manufacturer prior to installation. The requirement is for the safe and secure storage of all plant items in an undercover facility (warehouse). Storage, handling and movement of plant within the warehouse facility must meet Northern Powergrid's safety requirements for both the equipment and staff. The warehouse facility must be secure and must as a minimum feature 24 hour CCTV, a monitored alarm system and access control.

A strict stock control system must be implemented and managed. Movement of the equipment within the unit and the loading/unloading of the equipment will be the responsibility of the warehouse facility.

Ideally two storage facilities are required, one to service the Yorkshire licence area and one to service to Northeast licence area. The facilities must be easily accessible and centrally located and ideally situated close to the A1, A19, M1 or M62 motorway corridors. Each facility must have a floor storage space of approx. 500m² and have sufficient space for HGV's to safely manoeuvre when delivering or picking up plant items. The plant must be stored such that access to all items is possible without the need to manoeuvre items; this is required to gain access for inspection and testing purposes. Some of the electrical plant items will contain oil, hence adequate precautions must be in place to prevent any environmental contamination. The facility must, as a minimum, have spill kits and temporary bunds available at all times and all staff must be adequately trained to deal with oil spillage/leaks.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

Main site or place of performance

Northeast and Yorkshire

II.2.4) Description of the procurement

Ideally two storage facilities are required, one to service the Yorkshire licence area and one to service to Northeast licence area.

Ideally two storage facilities are required, one to service the Yorkshire licence area and one to service to Northeast licence area. The facilities must be easily accessible and centrally located and ideally situated close to the A1, A19, M1 or M62 motorway corridors.

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds
