II.1.4) Short description

Network Rail (NR) operates, maintains and develops Britain's rail tracks, signalling, bridges, tunnels, level crossings and many key stations. As a result, NR is one of the largest purchasers of energy in the United Kingdom (UK) with a total consumption of c.4.5TWh per annum. Her Majesty's Government (HMG) has made legal commitments to reduce greenhouse gas emissions to net zero by 2050. Network Rail as a government owned enterprise is committed to support the achievement of this objective. NR aims to decarbonise its non-traction energy consumption by directly purchasing renewable energy from specific renewable energy projects thus supporting the development of additional renewable energy generation. Network Rail is seeking to secure a corporate Power Purchase Agreement (cPPA) with a renewable energy generator for 45 GWh - 90GWh

per annum of renewable energy (Project CoPPA).
