Water

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Additional Water Process Development

Reference number

BAF002

II.1.2) Main CPV code

- 65110000 - Water distribution

II.1.3) Type of contract

Services

II.1.4) Short description

United Utilities have been requested to supply an additional 357.4l/s from their Raw Water feed from the River Dee. Hence, we are looking for any new Raw water connections to cover this request. The additional Raw Water demand is to feed 2 separate process developments in the local area. The first connection will require a maximum flow of 200l/s to the inlet of a tank which will be required to be continuously refilled. The second connection will require a maximum flow of 157.4l/s to the inlet of a tank, and will also require a continuous refill.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 60600000 - Water transport services
- 65100000 - Water distribution and related services

II.2.3) Place of performance

NUTS codes

- UKD - North West (England)

Main site or place of performance

North West of England

II.2.4) Description of the procurement

United Utilities have been requested to supply an additional 357.4l/s from their Raw Water feed from the River Dee. Hence, we are looking for any new Raw water connections to cover this request. The additional Raw Water demand is to feed 2 separate process developments in the local area. The first connection will require a maximum flow of 200l/s to the inlet of a tank which will be required to be continuously refilled. The second connection will require a maximum flow of 157.4l/s to the inlet of a tank, and will also require a continuous refill. Further to this, the detail of the water requirement is, listed with geographical location of where the water requirement is located.

- Ellesmere Port. For this, water usage will be required by the 1.1.2026.
- Ellesmere Port. This is a phased development with the initial 100 l/s allocated to Phase 2. This has an outline programme of 5 years for full occupation and it is anticipated that 75% of the plots will be occupied by year 3 (2025). By simple pro rata the development would require 75 l/s by 2025 and 100 l/s by 2027. Phase 3 requires an additional 100 l/s. Initial occupation unlikely until after 2027 and then probably a further 5 years from then to full occupation.

II.2.14) Additional information

1. If you cannot fulfil the full % of demand requested, could you please provide the % of demand that you can fulfil?
2. If supply is via alternative does that mean a new pipe or is the water still fed into the UU network which developers then draw demand off?
3. What would be the process for securing capacity with an alternative supplier?

II.3) Estimated date of publication of contract notice

9 January 2023

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section VI. Complementary information
