Scope

Reference

C17423

Description

NRS is looking to replace the three current EAMS systems with a single, unified, off the shelf platform, meeting current industry best practice and IT System requirements, i.e., cloud-based, data secure and evergreen. An updated data set that is organised and consistent across the business will form the basis of our Enterprise Asset Management System going forward. It is planned to extend the capability of the new system to potentially include other business activities and datasets, such as the Asset Condition database and Asset Risk database to create a more comprehensive information management system. Although the scope will cover the current 13 NRS sites, it will need to be flexible enough to potentially be rolled out across other sites, as appropriate, when they join NRS.

Total value (estimated)

- £21,200,000 excluding VAT

- £25,440,000 including VAT

Contract dates (estimated)

- 1 September 2026 to 31 August 2033
