I.4) Type of the contracting authority

Ministry or any other national or federal authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

CivTech 10.7 - How can technology help us deliver high-quality, scalable, public participation in decision-making, inspiring trust around ethical data use and sharing, AI, and wider public good activities?

II.1.2) Main CPV code

- 72000000 - IT services: consulting, software development, Internet and support

II.1.3) Type of contract

Services

II.1.4) Short description

A continuous and systematic public dialogue on uses of public data and AI would help us better understand and act on the public's expectations, thereby cultivating greater trust, while realising emerging technologies' benefits for public services.

Continuous public dialogues would also let the public's wishes contribute to evidence-led policy making, in real-time. However, under financial pressures, high-quality participation approaches can be too resource intensive for governments to use more widely.

Could technology help deliver high-quality, efficient, and scalable participation in Scottish Government decisions?

II.1.5) Estimated total value

Value excluding VAT: £650,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 48613000 - Electronic data management (EDM)

- 72212732 - Data security software development services
- 72300000 - Data services
- 72313000 - Data capture services
- 72314000 - Data collection and collation services
- 72316000 - Data analysis services
- 72322000 - Data management services
- 72330000 - Content or data standardization and classification services

II.2.3) Place of performance

NUTS codes

- UKM - Scotland

Main site or place of performance

Edinburgh

II.2.4) Description of the procurement

CivTech's mission is to drive daring and innovation in the public sector by collaboratively solving Challenges that make people's lives better – and in doing so create generations of sustainable, high growth businesses.

CivTech brings together public sector expertise and private sector innovation to solve real problems, develop new products, and deliver better, faster and easier services for everyone. Central to the approach is co-production with the citizen.

Part of the Scottish Government's Digital Directorate, CivTech's approach is helping transform public sector engagement with tech and innovation, delivering significant benefits to public services, producing genuine uplifts for the Scottish economy - and along the way, making lives better.

Across the country there are problems public sector organisations would like to solve and in the current environment the need for smart, efficient and effective products has never been greater. The Scottish Government is aware innovation is a good way to create them and is committed to ensuring a large part of its tech spend goes to smaller, innovative businesses. This is where CivTech comes in.

The CivTech Innovation Flow is designed to create products as quickly and effectively as possible, and uses a true Accelerator model at the heart of its Innovation Flow model. For

you – whether you're an individual, team or company – it's an opportunity to take on a Challenge, solve it, and win contracts with a blue-chip public sector organisation. You'll build a product, and a business to take it as far as possible. Because here's the kicker: the Challenges we issue aren't 'single organisation' problems – most exist worldwide.

In short: Open Challenges are set. Any organisation, team or individual can respond. Applications are assessed, and shortlisted proposals go into an Exploration Stage where they're developed further [for which participating applicants are paid]. The best go through to the Accelerator – a period of intensive work to create the solution, and through CivTech's unique business workshop system, a business capable of taking the product to the world.
