# I.4) Type of the contracting authority

Ministry or any other national or federal authority

## I.5) Main activity

General public services

## **Section II: Object**

## II.1) Scope of the procurement

#### II.1.1) Title

CivTech Challenge 10.2 - How can technology identify and measure firefighter exposure to contaminants across a wide range of incidents?

#### II.1.2) Main CPV code

• 72000000 - IT services: consulting, software development, Internet and support

#### II.1.3) Type of contract

Services

#### II.1.4) Short description

Firefighters are routinely exposed to a variety of contaminants during and after fire incidents. These contaminants can include chemical, biological, and particulate matter that pose significant health risks. The issue of contaminant exposure is both an emerging area of concern and study, with the safety of firefighters, staff, and the public being paramount. With contaminants identified, the risks that exposure to contaminants pose to firefighters at an incident, or to firefighters, staff, and members of the public (that come into contact with firefighting personnel and equipment post incident), can be better understood and managed. Having a better understanding of data of contamination by individual and cumulative exposure would be a significant development in further enhancing the safety of firefighters, staff, and the public.

#### II.1.5) Estimated total value

Value excluding VAT: £650,000

#### II.1.6) Information about lots

This contract is divided into lots: No

## II.2) Description

## II.2.2) Additional CPV code(s)

- 30236200 Data-processing equipment
- 32580000 Data equipment
- 32260000 Data-transmission equipment
- 38341500 Contamination-monitoring devices

#### II.2.3) Place of performance

**NUTS** codes

· UKM - Scotland

Main site or place of performance

#### Edinburgh

#### II.2.4) Description of the procurement

CivTech's mission is to drive daring and innovation in the public sector by collaboratively solving Challenges that make people's lives better – and in doing so create generations of sustainable, high growth businesses.

CivTech brings together public sector expertise and private sector innovation to solve real problems, develop new products, and deliver better, faster and easier services for everyone. Central to the approach is co-production with the citizen.

Part of the Scottish Government's Digital Directorate, CivTech's approach is helping transform public sector engagement with tech and innovation, delivering significant benefits to public services, producing genuine uplifts for the Scottish economy - and along the way, making lives better.

Across the country there are problems public sector organisations would like to solve and in the current environment the need for smart, efficient and effective products has never been greater. The Scottish Government is aware innovation is a good way to create them and is committed to ensuring a large part of its tech spend goes to smaller, innovative businesses. This is where CivTech comes in.

The CivTech Innovation Flow is designed to create products as quickly and effectively as possible, and uses a true Accelerator model at the heart of its Innovation Flow model. For you – whether you're an individual, team or company – it's an opportunity to take on a Challenge, solve it, and win contracts with a blue-chip public sector organisation. You'll build a product, and a business to take it as far as possible. Because here's the kicker:

the Challenges we issue aren't 'single organisation' problems – most exist worldwide.

In short: Open Challenges are set. Any organisation, team or individual can respond. Applications are assessed, and shortlisted proposals go into an Exploration Stage where they're developed further [for which participating applicants are paid]. The best go through to the Accelerator – a period of intensive work to create the solution, and through CivTech's unique business workshop system, a business capable of taking the product to the world.

Please visit our website for information on CivTech and how to get involved.
