### **Scope**

### **Reference**

NCC-2025-00069

### **Description**

A Charger is a mechanical trolley operated within the internal area of the Crematorium. Its primary function is to receive a coffin from the catafalque inside the chapel at the conclusion of a funeral service. Once the coffin is received, the Charger transports it to the charging wall and positions it at the appropriate cremator door. The ongoing building works for installing the new cremator will accommodate one specific model, the LEEC COMPACT CREMATOR, which can operate in this limited space.
