Scoring Methodology Technical:

0-Unacceptable-Nil or inadequate response. Fails to demonstrate an ability to meet the requirement.

25-Poor-Response is partially relevant and poor. The response addresses some elements of the requirement but contains insufficient/limited detail or explanation to demonstrate how the requirement will be fulfilled.

50-Acceptable-Response is relevant and acceptable. The response addresses a broad understanding of the requirement but may lack details on how the requirement will be fulfilled in certain areas.

75-Good-Response is relevant and good. The response is sufficiently detailed to demonstrate a good understanding and provides details on how the requirements will be fulfilled.

100-Excellent-Response is completely relevant and excellent overall. The response is comprehensive, unambiguous and demonstrates a thorough understanding of the requirement and provides details of how the requirement will be met in full.

Any Bidder that receives a score detailed in the Invitation to Tender against the relevant question will be excluded from the tender

Tenderers should note that although the value of the Framework has been estimated at 5,040,000 GBP excluding VAT over the maximum four year framework period, the Authority reserves the right to modify the Framework– irrespective of the monetary value of modifications – within the scope permitted under Regulation 72 (1) of The Public Contracts (Scotland) Regulations 2015, should operational reasons require it.

Please refer to the "Framework Agreement" Document; Section 2.4 contained within the Tender Pack on PCS-T for a full list of operational reasons for modifications.

The Contracting Authority does not intend to include a sub-contract clause as part of community benefits (as per Section 25 of the Procurement Reform (Scotland) Act 2014) in this contract for the following reason:

It will be encouraged for prime contractors to advertise sub-contracting opportunities via PCS, however it will not be mandated as use of PCS to advertise sub-contracting opportunities is not intended to cut across supply chain arrangements that the prime contractor may already have in place. The PIN responses and sub-contracting pattern have evidenced an established sub-contracting network. Whilst it does represent best practice, use of PCS in this instance is unlikely to add any additional value and may delay mobilisation.

The Contracting Authority does not intend to include any community benefit requirements in

this contract for the following reason:

Due to the value of each of the lots being fairly low with a maximum lot value of 600K GBP and due to the variety of surveys included within the framework it is not expected any supplier will tender for more than half the number of surveys, it is expected that due to volumes of work the majority of suppliers within each lot will be used. Therefore, no supplier will be delivering a significant % of the overall framework value as such community benefits have not been included in this tender.
