Lot 1 is for our private depot sites, Lot 2 is for public charging.

### **II.2.2) Additional CPV code(s)**

- 31000000 - Electrical machinery, apparatus, equipment and consumables; lighting

### **II.2.3) Place of performance**

NUTS codes

- UKH14 - Suffolk

### **II.2.4) Description of the procurement**

West Suffolk Council (WSC) is a district council covering a population of 179,900 (2021) which has six market towns: Brandon, Bury St Edmunds, Clare, Haverhill, Mildenhall and Newmarket. West Suffolk Council has committed to net zero emissions by 2030 and has begun its works to reduce the emissions from its buildings, operations, and activities. West Suffolk Council recognises that Electric Vehicles (EVs) are becoming mainstream within our society and that the authority will need to play a part in the roll out of infrastructure to support this new technology. EVs form a vital part of the decarbonisation plans and are at the core of plans for cleaner air both in Suffolk and at a national level. West Suffolk Council are the principal owner and controller of car parking within many of our major towns and as such we are planning to provide both a rapid/ultra-rapid charging (50kW+) provision for each town, and a good level of 7-22kW chargers across our long-stay spaces within each town. The objectives of the procurement are:

- To secure value for money services
- To provide EV drivers with a uniform experience when using charging infrastructure in West Suffolk owned car parks and assets.
- To encourage EV uptake among residents by means of providing a clear, reliable, affordable, easy to use, and accessible level of charging provision within West Suffolk. We want customers to be confident they understand what they are paying for, that the chargers will work when they need them, and they are supported when something doesn't work as expected
- To enable the transition to low emissions vehicles within WSC's fleet which is key in working towards its net zero carbon emissions goal by 2030
- To build a good working relationship with a charge point supplier and operator (CPO) over the next 15 years (contract is 10+2+2+1)
- To provide chargers that are accessible to all users in terms of space for wheelchairs, height of units, managing cables, and screen and information readability

There are two lots, Lot 1 is for our private depot sites, Lot 2 is for public charging. If you would like to submit bids for both lots, please complete two quotation forms. We would encourage CPOs to enter submissions for both lots. Funding for Lot 1 will be through the workplace charging scheme and internal funds. Funding for Lot 2 will be through ORCs/LEVI and contributions from CPOs.

### **II.2.5) Award criteria**

Price is not the only award criterion and all criteria are stated only in the procurement documents

### **II.2.7) Duration of the contract, framework agreement or dynamic purchasing system**

Start date

7 November 2022

End date

6 November 2032

This contract is subject to renewal

No

### **II.2.10) Information about variants**

Variants will be accepted: Yes

### **II.2.11) Information about options**

Options: No

### **II.2.13) Information about European Union Funds**

The procurement is related to a project and/or programme financed by European Union funds: No

## **II.2) Description**

### **II.2.1) Title**

Lot 2 is for public charging.

Lot No

2

### **II.2.2) Additional CPV code(s)**

- 31000000 - Electrical machinery, apparatus, equipment and consumables; lighting

### **II.2.3) Place of performance**

NUTS codes
