Car Park and Road Resurfacing Works with Contractors Design 2025.

Design, Supply and Installation of Car Park & Road Surface at Jubilee Field/Everside Lane, Cam, GL11 5JQ.

The Parish Council would like to clear and resurface the second car park. The area to be cleared is approximately 892.22m². The area for resurfacing (including cleared area) is approximately 1,835.5m². The Parish Council would ideally like to see the resurfacing of the car park with TYPE 1 MOT. The surface must be permeable as the site is potentially 'gassing' due to historical landfill use.

The Council would like to re-construct the area of Everside Lane. The length of this section of the lane requiring removing and rebuilding is approximately 170m. The surface will need to be started with terram, then Type 1 stone rolled. Ideally, a 10mm to dust layer to finish.

Please see ITT document for full details.
