#### **II.1.4) Short description**

The FCA is refreshing its Market Surveillance capability and is looking to update and develop the functionality/scope or capabilities of its current solution.

The current capability is a cloud hosted big data solution that receives around 30m Transaction Reports and circa 200m Order messages covering market activity on around 10,000 listed Products (with associated derivatives) each day and generates alerts to detect potential market abuse and identify trends for further investigation by analysts.

As part of this refresh the FCA would like to extend current capabilities beyond secondary market activity into the near real-time world of issues affecting listed companies.

The solution will be delivered as Software as a Service (SaaS).

All details of the requirements are provided in the ITT documentation.
