Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Contract for the provision of Gas Detection Equipment Servicing & Calibration

II.1.2) Main CPV code

- 50410000 - Repair and maintenance services of measuring, testing and checking apparatus

II.1.3) Type of contract

Services

II.1.4) Short description

Gas measurement & detection tools are critically important pieces of equipment that assist NGN operations in detecting and measuring gas. NGN are seeking to award a contract to a single supplier to service / calibrate its existing gas detection units and also purchase circa 100 gas detection units for use on the network. This urgent requirement is due to the winter contingency period where there is more operational activity with regards to gas escapes etc... requiring more resource and equipment to keep customers safe.

NGN are looking to tender out this requirement in 2023 once the winter contingency period has passed.

II.1.4

Read

Text

There has been a delay in the process and the actions from the original VEAT dated 24th January 2023 are now being finalised. The contract will run until 31st December 2024, this will cover the service / calibration of existing gas detection units and the purchase of the original circa 100 gas detection units plus any additional ad-hoc requirements within the term of this contract.

NGN will now be looking to tender out this requirement in 2024.
