II.1.4) Short description

This notice was originally published towards the end of 2023 and has been reissued with additional information.

University Hospitals Birmingham NHS Foundation Trust (“UHB”) is one of the UK’s largest NHS Trusts that runs the Queen Elizabeth Hospital Birmingham, Birmingham Chest Clinic, Heartlands Hospital, Good Hope Hospital, Solihull Hospital, and various community services across the region, and is one of the highest performing Health organisations in Europe with a proven international reputation for its quality of care, information technology, clinical education and training and research.

The trust has 2,366 in-patient beds over 105 wards in addition to 115 children’s beds and 145 day case beds. The trust operates 7,127 outpatients’ and 304 community clinics per week with a workforce of over 20,000 members of staff.

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKG - West Midlands (England)

Main site or place of performance

UHB NHSFT

II.2.4) Description of the procurement

UHB is looking to source a solution from suppliers which replaces the current Enterprise Content Management Platform software for the storage of all types of electronic media and a clinical record viewer. This will aim to scan, store and retrieve all electronic based media types to support our clinical Electronic Patient Record and to improve operational performance; improve patient outcomes and improve ways of working for staff.

The role of this software is to electronically store part of the patient electronic clinical record as we continue our direction towards a paperless environment. The current solution has been in use since 2009 and has 106 million documents covering 4.6 million patients record and sized at 40TB (PDF's 36.74TB and 0.3 TB thumbnails). These documents are regularly accessed by our clinicians to deliver high quality patient care. Documents are currently accessed and viewed by an inhouse viewer.

Over the last decade there has been a national drive to allow patients to have access to the information we hold. This has been achieved in the NHS via local patient portals or via the national NHS App. Currently this information is limited to referral or appointment data, but the national trend is to make all electronic media that we hold available to patients. This solution must be able to support this strategy via integration with local shared care records, patient portals and /or the NHS App.

As well as the above requirements the Trust would also be looking for a new supplier to have experience of migrating data from our current Enterprise Content Management solution and experience work delivering in the NHS market.

II.3) Estimated date of publication of contract notice

31 March 2025

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No
