II.1.4) Short description

NHS Supply Chain seeks to establish a non-exclusive Framework Agreement for supply to NHS Supply Chain depots via the Stock and Blue Diamond routes and to the NHS Supply Chain customer base via the E-Direct Route.

The Framework Agreement is for the supply of Central Venous Catheters and Associated Products.

It is anticipated that in the first 12 months of the Framework Agreement the value of purchases will be circa £12,943,000. For the full 48 month term (if extended) the anticipated value is circa £57,466,760. These values are approximate only and are based on the most recent historical usage information, with a forecasted level of growth. The values provided are for guidance only and are not a guarantee of business.

NHS Supply Chain anticipates appointing all Applicants who have met the minimum requirements which are set out in these tender documents and whose total score meets or exceeds a hurdle of at least 35% when rounded up or down (as the case may be) from four decimal places to the nearest whole number at tender evaluation stage to the relevant Product Line of the Framework Agreement.

II.2.4) Description of the procurement

A port is a small medical appliance that is installed beneath the skin. A catheter (plastic tube) connects the port to a vein. Under the skin, the port has a septum (a silicone membrane) through which drugs can be injected and blood samples can be drawn multiple times, resulting in less discomfort for the patient than a more typical "needle stick". Ports are used mostly to treat haematology and oncology patients. The port is usually inserted in the upper chest (known as a "chest port"), just below the clavicle or collar bone, with the

catheter inserted into the jugular vein.
