## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

Tourism Digital Territorial analysis tool

#### **II.1.2) Main CPV code**

- 72316000 - Data analysis services

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

East Suffolk Council (ESC) are looking to procure an online tracking and monitoring information tool. As part of work associated with SizewellC Tourism Fund, there is a requirement to monitor and report impact on the tourism industry. Therefore, ESC are

looking for a suitable tool that collects and analyses qualitative and quantitative data in real-time. ESC wish to track online reviews, social media posts, and general sentiment expressed about the destination. Reporting facilities and assessment of the various sentiment tracking data to enable extraction of information is essential. Potential suppliers will not be prejudiced by any response to this PIN, or failure to respond. This PIN does not formally signify the beginning of a procurement and does not constitute a commitment by the Council to undertake any procurement exercise.

### **II.1.5) Estimated total value**

Value excluding VAT: £40,000

### **II.1.6) Information about lots**

This contract is divided into lots: No

## **II.2) Description**

### **II.2.2) Additional CPV code(s)**

- 71354100 - Digital mapping services
- 72316000 - Data analysis services

### **II.2.3) Place of performance**

NUTS codes

- UKH14 - Suffolk

### **II.2.4) Description of the procurement**

Sizewell C (SZC) is a new 3.2 gigawatt (GW) nuclear power station being built to the north of Sizewell B. Once built, it will generate enough low-carbon electricity to supply 6 million homes for the next 60 years. Development consent (the DCO) was granted on 15 July 2022 and the project formally commenced on 15 January 2024. A Deed of Obligation (DoO) has been agreed as part of the planning (DCO) process for SZC, to mitigate potential impacts associated with the construction of the power station, whilst ensuring legacy benefits for local communities for decades to come. This includes various 'funds' to help mitigate impacts felt by the community and businesses such as the Tourism Industry. Tourism Monitoring Information In the context of the DoO, Tourism Monitoring Information means: a. Monitoring information across socio-economic, environmental and transport indicators that may be relevant to potential effects on tourism; and b. Information reported to the Tourism

Working Group by the Tourism Programme Manager. East Suffolk Council are looking to obtain information about the area relating to online bookings such as visitor accommodation prices and occupancy levels to demonstrate performance in comparison to other areas regionally and nationally. East Suffolk Council wish to track sentiment and visitor experiences to track trends and impacts on behaviour, choice and perceptions, across the various sectors such as hospitality, visitor accommodation, events and cultural activities. We are looking for a system which analyses this information and brings it together via a dashboard or similar to illustrate the information gathered and ideally the associated economics, sentiment and trends. From this data we wish to ascertain how healthy the industry is over time. We wish to track if experiences were positive and the levels of satisfaction to help identify areas of priority for future funding initiatives. Also for data on events and cultural activities we wish to see expected income back into the economy, expected footfall and linked to occupancy/revenue generation/visitation to link to demonstrate impact/benefit. Essential aspects must feature the opportunity to compare timeframes year on year, month by month. Market behaviours and preferences. Competitor analysis, and occupancy rates, including average price rates. Media monitoring to check for relevant keywords + hashtags used across all social networks and online, ideally broken down further, by geographic location ie per Town. Historic data is vital to help us forecast trends and impacts. The system we are looking for must have the capability to extract reports, integrate with existing systems via Application Programming Interface (API) and be user friendly. The Council is looking to purchase an annual licence to a suitable system that will enable access to monitoring data. Potential suppliers that are interested in this opportunity should register their interest by sending an email to [procurement@eastsuffolk.gov.uk](mailto:procurement@eastsuffolk.gov.uk) by the 24th of August, 2024

## **II.3) Estimated date of publication of contract notice**

30 September 2024
