Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The services can be provided only by a particular economic operator for the following reason:
 - protection of exclusive rights, including intellectual property rights

Explanation:

FSNI tested the market for Helium with BIPS in 2013 when they tendered for the Supply & Delivery of Gases, this product had to be removed from the tender specification as no other supplier was permitted to supply Helium BIPS which only the appointed contractor can supply. Horizon scanning has continued since then to understand whether there may be an alternative in provision that could provide the same level of purity required and recent market sounding has confirmed that there remains no alternative to the patented product offered by the appointed contractor. BIPS cylinders are exclusive to the appointed contractor, who developed and own the Built In Purification System. The appointed contractor have this system patented, therefore no other supplier can offer the same or similar products in UK or Ireland. Further research (2023/24) in the market has confirmed that the appointed contractor remains the only provider capable of providing high purity helium.
