I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Education

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

(NU/1782) Supply and Installation of a Clinical Data Management System and a Randomisation System

Reference number

DN629737

II.1.2) Main CPV code

- 48810000 - Information systems

II.1.3) Type of contract

Supplies

II.1.4) Short description

Newcastle Clinical Trials Unit (NCTU) is a UKCRC Registered CTU that works in collaboration with investigators to design and deliver clinical trials and studies answering important clinical questions, whose findings bring substantial impact to patients and the NHS; it has a portfolio across many clinical disciplines and from different funders (public, commercial, and charitable). There are currently over 40 active interventional trials with a total funding value in excess of £30m, these include international trials and a growing portfolio of trials with adaptive designs. Most of the portfolio are regulated by the Medicines for Healthcare Products Regulatory Agency (MHRA).

NCTU works in a demanding and constantly evolving ethical, legal, regulatory and scientific landscape, across multiple countries. We seek opportunities for faster, more efficient, cost effective, and better research. NCTU requires systems that ensure robust trial design are conducted in line with MHRA and other legislated regulatory requirements that stand up to international scrutiny. The systems(s) must be suitable for use in academic trials units and ensure they operate in a way which is compliant with applicable legislation. The systems should combine excellent functionality with customisability that will also require the set-up time of trials to be minimised without impacting on staff time needed to develop, test, and deploy trials and studies within the system. Staff move between locations to work, including from NHS Trusts and from home, and thus secure access from any location is needed to both build and manage the systems.

The scope is for the supply, implementation and support for a Clinical Data Management

System and Randomisation System to be used by all members of the NCTU, and by trial teams across multiple clinical sites, nationally and globally. The requirements are for established cloud-based, off the shelf solutions which are in use within clinical trial environments. The systems must be accessed via a web-based interface. The systems must have different user profiles to support the setting up, management and data removal for statistical analysis.

This tender process is divided two lots. Suppliers may submit a bid for one of the lots or both lots. Each Lot will be assessed separately. Lot 1 - Clinical Data Management System and Lot 2 – Randomisation System.

II.1.5) Estimated total value

Value excluding VAT: £3,750,000

II.1.6) Information about lots

This contract is divided into lots: Yes

Tenders may be submitted for all lots

II.2) Description

II.2.1) Title

Lot 1 Clinical Data Management System

Lot No

1

II.2.2) Additional CPV code(s)

- 48600000 - Database and operating software package

II.2.3) Place of performance

NUTS codes

- UKC22 - Tyneside

II.2.4) Description of the procurement

Newcastle Clinical Trials Unit (NCTU) is a UKCRC Registered CTU that works in collaboration with investigators to design and deliver clinical trials and studies answering important clinical questions, whose findings bring substantial impact to patients and the

NHS; it has a portfolio across many clinical disciplines and from different funders (public, commercial, and charitable). There are currently over 40 active interventional trials with a total funding value in excess of £30m, these include international trials and a growing portfolio of trials with adaptive designs. Most of the portfolio are regulated by the Medicines for Healthcare Products Regulatory Agency (MHRA).

NCTU works in a demanding and constantly evolving ethical, legal, regulatory and scientific landscape, across multiple countries. We seek opportunities for faster, more efficient, cost effective, and better research. NCTU requires systems that ensure robust trial design are conducted in line with MHRA and other legislated regulatory requirements that stand up to international scrutiny. The systems(s) must be suitable for use in academic trials units and ensure they operate in a way which is compliant with applicable legislation. The systems should combine excellent functionality with customisability that will also require the set-up time of trials to be minimised without impacting on staff time needed to develop, test, and deploy trials and studies within the system. Staff move between locations to work, including from NHS Trusts and from home, and thus secure access from any location is needed to both build and manage the systems.

The scope is for the supply, implementation and support for a Clinical Data Management System and Randomisation System to be used by all members of the NCTU, and by trial teams across multiple clinical sites, nationally and globally. II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £2,000,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

This contract is subject to renewal

Yes

Description of renewals

The initial contract term shall be for 5 years from the go-live date with an option to extend the contract for an additional 5 years, or for periods of 2 years thereafter. The total number of years for live running before a full re-tender exercise is undertaken shall not exceed 15 years. The justification for the length of contract is length of time for the clinical trials and the difficulty of extracting the data from live trials.

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2) Description

II.2.1) Title

Lot 2 Randomisation System

Lot No

2

II.2.2) Additional CPV code(s)

- 48600000 - Database and operating software package

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

17 October 2022

Local time

12:00pm

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.6) Minimum time frame during which the tenderer must maintain the tender

Duration in months: 3 (from the date stated for receipt of tender)

IV.2.7) Conditions for opening of tenders

Date

17 October 2022

Local time

2:00pm

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.4) Procedures for review

VI.4.1) Review body

Newcastle University

Newcastle upon Tyne

Country

United Kingdom

Internet address

<https://www.ncl.ac.uk>

VI.4.3) Review procedure

Precise information on deadline(s) for review procedures

Newcastle University will incorporate a minimum 10 calendar day standstill period at the point information on the award of the contract is communicated to tenderers. This period allows unsuccessful tenderers to seek further debriefing before the contract is entered into. Applicants have 2 working days from notification of the award decision to request additional debriefing and 4 / 4 that information has to be provided a minimum of 3 working days before expiry of the standstill period. Such additional information should be requested from the address referred to in part 1.1 above. If an appeal regarding the award of a contract has not been successfully resolved, the Public Contracts Regulations 2015 provide for aggrieved parties who have been harmed or are at risk of harm by a breach of the rules to take action in the High Court (England, Wales and Northern Ireland). Any such action must be brought promptly. Where a contract has not been entered into the Court may order the setting aside of the award decision or order the authority to amend any document and may award damages. If the contract has been entered into the Court may only award damages
