Beach Management Framework

ENVIRONMENT AGENCY

UK1: Pipeline notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-026155

Procurement identifier (OCID): ocids-h6vhtk-0521fc

Published 23 May 2025, 12:10pm

Scope

Description

The EA requires a Framework to deliver its routine and ad-hoc beach maintenance works across all coastal frontages in England that it is responsible for. This maintenance typically consists of moving/transporting large volumes of shingle from areas of accretion to areas of erosion and evenly re-distributing shingle along the sea to restore/maintain the required standard of protection. There is a requirement to import marine dredged or land-based shingle onto coastal frontages to replenish lost material and to conduct maintenance/repairs to coastal defences and structures. There is a requirement to import and place rock on coastal frontages, as well as to provide coastal incident response, recovery and readiness support in the event of extreme weather events. This maintenance is essential to minimise the risk of coastal flooding to members of the public, properties and commercial businesses. The Framework duration will be a 6 year (72 months) initial duration with a 2 year (24 months) extension option. Please note: This is NOT a call for competition. All Framework information provided is subject to change including the programme dates, contract value and is not a guarantee of the level of work that will be generated through any future Framework.
