Tender

## **ITT - Research Scanning Electron Microscope**

National Physical Laboratory

F02: Contract notice

Notice identifier: 2022/S 000-026316

Procurement identifier (OCID): ocds-h6vhtk-0369dc

Published 21 September 2022, 10:32am

### **Section I: Contracting authority**

#### **I.1) Name and addresses**

National Physical Laboratory

Hampton Road

Teddington

TW11 0LW

#### **Email**

[charley.choules@npl.co.uk](mailto:charley.choules@npl.co.uk)

#### **Country**

United Kingdom

#### **Region code**

UK - United Kingdom

## **Internet address(es)**

Main address

[www.npl.co.uk](http://www.npl.co.uk)

## **I.3) Communication**

The procurement documents are available for unrestricted and full direct access, free of charge, at

<https://lupc.bravosolution.co.uk/web/login.shtml>

Additional information can be obtained from the above-mentioned address

Tenders or requests to participate must be submitted electronically via

<https://lupc.bravosolution.co.uk/web/login.shtml>

Tenders or requests to participate must be submitted to the above-mentioned address

## **I.4) Type of the contracting authority**

Body governed by public law

## **I.5) Main activity**

Other activity

Research

---

## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

ITT - Research Scanning Electron Microscope

#### **II.1.2) Main CPV code**

- 38000000 - Laboratory, optical and precision equipments (excl. glasses)

#### **II.1.3) Type of contract**

Supplies

#### **II.1.4) Short description**

The National Physical Laboratory [NPL] requirement is for a Scanning Electron Microscope suitable for high resolution micro-structural characterisation of a wide range of samples. Imaging capabilities should encompass ultra-high resolution of biological nanoparticles with dimensions of 10 nm through to image acquisition of regions 10 mm in size through stitching of multiple images. Conductive and non-conductive samples will require to be imaged and methods for charge dissipation without significant loss of resolution will be required.

The microscope is also required to be suitable for analytical measurements by Energy Dispersive X-ray Spectroscopy (EDX) and Electron Backscatter Diffraction (EBSD). Detectors for these methods should be supplied as an integrated solution and the system must be capable of high beam current densities to enable these detectors to run at their highest possible rates whilst also maintaining capabilities for high resolution imaging with low beam currents.

It is also intended to use the microscope for in situ micromechanical testing, so the specification also includes the provision of a mechanical test stage suitable for testing of mm scale test samples, including heating to high temperatures.

#### **II.1.6) Information about lots**

This contract is divided into lots: No

### **II.2) Description**

### **II.2.3) Place of performance**

NUTS codes

- UK - United Kingdom

### **II.2.4) Description of the procurement**

The National Physical Laboratory [NPL] requirement is for a Scanning Electron Microscope suitable for high resolution micro-structural characterisation of a wide range of samples. Imaging capabilities should encompass ultra-high resolution of biological nanoparticles with dimensions of 10 nm through to image acquisition of regions 10 mm in size through stitching of multiple images. Conductive and non-conductive samples will require to be imaged and methods for charge dissipation without significant loss of resolution will be required.

The microscope is also required to be suitable for analytical measurements by Energy Dispersive X-ray Spectroscopy (EDX) and Electron Backscatter Diffraction (EBSD). Detectors for these methods should be supplied as an integrated solution and the system must be capable of high beam current densities to enable these detectors to run at their highest possible rates whilst also maintaining capabilities for high resolution imaging with low beam currents.

It is also intended to use the microscope for in situ micromechanical testing, so the specification also includes the provision of a mechanical test stage suitable for testing of mm scale test samples, including heating to high temperatures.

### **II.2.5) Award criteria**

Price is not the only award criterion and all criteria are stated only in the procurement documents

### **II.2.7) Duration of the contract, framework agreement or dynamic purchasing system**

Start date

30 December 2022

End date

29 December 2023

This contract is subject to renewal

No

#### **II.2.10) Information about variants**

Variants will be accepted: No

#### **II.2.11) Information about options**

Options: No

#### **II.2.13) Information about European Union Funds**

The procurement is related to a project and/or programme financed by European Union funds: No

---

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.1) Type of procedure**

Open procedure

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: No

### **IV.2) Administrative information**

#### **IV.2.2) Time limit for receipt of tenders or requests to participate**

Date

21 October 2022

Local time

5:00pm

#### **IV.2.4) Languages in which tenders or requests to participate may be submitted**

English

#### **IV.2.7) Conditions for opening of tenders**

Date

21 October 2022

Local time

5:00pm

---

## **Section VI. Complementary information**

### **VI.1) Information about recurrence**

This is a recurrent procurement: No

### **VI.4) Procedures for review**

#### **VI.4.1) Review body**

NPL Management Ltd

Hampton Road

Teddington

TW11 0LW

Country

United Kingdom
